Business Review

Results and Performance

The results of the Company for the year, as shown on page 7, show a profit on ordinary activities before tax of \$36,687 (2011: profit of \$67,826).

At 31 December 2012, the shareholders' funds of the Company, as shown on page 8, total \$199,969 (2011: \$172,270).

Business Environment and Strategy

The directors consider the level of business and year-end financial position of the Company to be satisfactory and expect the present level of activity to improve in the future.

UIIC intends to continue offering insurance policies. The Company depends on this business development, and therefore these intentions suggest that the Company will continue with its principal activity, to act as an underwriting agent.

Principal Risks and Uncertainties

The principal risks and uncertainties are unchanged and laid out below:

Financial Risk

The Company is exposed to financial risks through its financial assets and financial liabilities. In particular, the key financial risks may arise:

Liquidity risk - Liquidity risk is the risk that cash may not be available to pay obligations when due, at a reasonable cost. In this regard, the amounts receivable from third parties and group companies are monitored regularly by management.

Credit risk - Credit risk is the risk that a counterparty will be unable to pay amounts in full when due. The key areas where the Company is exposed to credit risk are:

- amounts due from group companies this is addressed under group risk below; and
- amounts due from third parties (insurance contract holders and intermediaries).

Bad debts are monitored on a monthly basis, and appropriate adjustments are made where collection of an amount is doubtful or unlikely.

Interest rate risk – Interest rate risk arises mainly from the changes in the rate of return on cash held at bank.

Foreign exchange risk - The reporting currency of the Company is United States dollars. Although the majority of the Company's transactions are denominated in United States dollars, certain administrative expenses are transacted in UK Sterling. As a result, the Company is exposed to currency risk on fluctuations in the rate of exchange from the receipt of the supplier invoice to the date of its settlement.

Directors' Report for the year ended 31 December 2012

Principal Risks and Uncertainties (continued)

Future Outlook

The future outlook of the Company is closely linked to the business strategy of the UIIC, for which it acts as an underwriting agent. Currently UIIC is developing and implementing strategies to improve the overall development and growth of its business to ensure that it is able to continue its operation for the foreseeable future. Part of the UIIC action plan is to ensure that there is premium growth for the company. The effectiveness of these strategies will ensure that the future outlook of the Company is stable.

Notes to the Financial Statements for the year ended 31 December 2012

1 Statement of Accounting Policies

A) Basis of Preparation

The financial statements have been prepared in accordance with the historical cost convention, the Companies Act 2006 and the applicable UK accounting standards.

The financial statements have been drawn up in United States dollars as the majority of the assets, liabilities and Company's transactions are denominated in that currency.

B) Accounting Policies

A summary of the significant accounting policies is set out below:

Turnover

Turnover represents commission and management fee receivable in respect of the Company's services as an underwriting agent for Uzbekinvest International Insurance Company Limited (UIIC). Since the Company has no ongoing obligation in respect of this income, it is recognised when the premium to which the income relates is notified to the Company by UIIC. As the Company also acts as a service company on behalf of UIIC all expenses incurred are recharged back to the Company.

Turnover also includes a 7% mark up on all intercompany invoices paid on behalf of UIIC. This is per the amended service agreement dated 16 May 2011 between the Company and UIIC.

Tax

The charge for taxation is based on the results for the year adjusted for disallowable items and items not chargeable to tax. Deferred tax is provided in full on all material timing differences. Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax is calculated at the enacted or substantially enacted rate. Deferred tax balances are not discounted.

Insurance balances

The Company acts as an underwriting agent on behalf of a group company, UIIC. It is not liable, as an agent, either for premiums due to the insurer or for claims payable to its policyholders. Notwithstanding the legal relationship with clients and insurers and since in practice premium and claim monies are ordinarily accounted for by insurance intermediaries as if they were principals in the insurance contracts, cash balances, debtors and creditors relating to insurance business are treated as the Company's assets and liabilities.

Foreign currencies

Monetary assets and liabilities in foreign currencies are translated into US dollars at the mid-market rates of exchange ruling on the balance sheet date. Transactions during the year are translated into US dollars using the rates of exchange prevailing at the date of the transaction. The exchange gains and losses are included in the profit and loss account, under other expenses.

Administration expenses

Administration expenses consist mainly of expenses incurred in relation to the Company's role as a service company, on behalf of UIIC. Expenses also include legal and professional fees, and brokerage fees payable in relation to any premiums written, when acting as an underwriting agent.
