

## **JOB ANNOUNCEMENT**

Hamilton-Madison House is seeking a full-time PROS Counselor who will be responsible for providing counseling and social services to individuals and groups in the HMH's Behavioral Health Program. He/she provides clinical services during PROS program intake process, facilitates appropriate referrals, and assigns cases to appropriate clinicians; provides individual, group, family psychoeducation, and case management to HMH's behavioral health clients and maintain medical records documentation by the program and in compliance with policies and procedures of HMH and New York State Office of Mental Health (OMH).

### **Responsibilities:**

- Provide clinical assessment and recovery-oriented services in individual, family and group settings
- Conduct assessment and evaluation during intake process for substance use disorders/mental health illness/history of hospitalizations/past or present issues with medications/trauma/domestic abuse
- Support individuals with severe mental illness and their family members in their psychiatric rehabilitation process
- Perform intensive case management to connect patients with high-risk factors to appropriate community resources
- Develop mental health recovery plans, facilitate the service delivery according to plan, and monitor patients use of medication and progress
- Apply various counseling & therapy approaches such as MI/CBT to help patients recover from their disorders
- Provide conflict resolution during crisis situations, coordinate recovery efforts with mental health professionals and other health professionals such as doctors, nurses, and social workers
- Engage in research projects/outreach/educational activities as assigned

### **Minimum Qualifications:**

- Master's degree in Psychology, Mental Health Counseling or a closely related field
- Sound knowledge of human behavior, learning & motivation, psychological testing & assessment, mental health, psychiatric rehabilitation, cognitive behavior therapy (CBT), critical perspectives on nontraditional psychotherapies, applied regression analysis
- In-depth understanding of theory/diagnosis/treatment/rehabilitation of mental disorders
- Strong ability to explore clinical psychological research methods, develop mental health recovery plan and perform case management

- Excellent interpersonal and communication skills in working with individuals and groups to promote optimum mental and emotional health
- Familiar with NYS OMH' policies and procedures

Compensation: \$44,156.58/year

Hours: Monday to Friday, 9am – 5pm, 37.5 hours per week
