## ONETOUCH® VERIO®SYNC SYSTEM

### OneTouch® Verio®Sync System

**NEW**

Now you can check your blood sugar results as easily as you check everything else — on your iPhone®. The OneTouch® Verio®Sync is the first meter to automatically send blood sugar results wirelessly to an iPhone®, iPad® or iPod touch® using the OneTouch® Reveal™ mobile app. The OneTouch® Reveal™ mobile app is easy to use, features a 14-day snapshot to show you how often you are in range, allows you to share your results via email or text message, and more. The OneTouch® Reveal™ mobile app can be downloaded free from the App Store.

ITEM #	HCPCS	SOLD BY
022396I	E0607	ea

Apple, The Apple logo, iPhone, iPad and iPod Touch are trademarks of Apple Inc., Registered in the U.S. and other countries. App Store is a service mark of Apple Inc.

## ONETOUCH® VERIO®

### OneTouch® Verio®IQ Meter

The OneTouch® Verio®IQ Meter offers a simple way to check your blood sugar. Big, bold numbers on a color LCD screen make your results easy to read. And when it's lights out, it lights up the top and screen for simple testing in the dark. Plus, it uses our smallest blood sample ever, does not require any coding and comes with an eco-friendly, rechargeable battery. 750 blood-glucose test results, 50 pattern messages.

ITEM #	HCPCS	SOLD BY
022267IM	E0607	ea

### OneTouch® Verio® Test Strips

Utilizes SmartScan™ Technology to actively scan each sample 500 times and correct for common interferences to provide precise, accurate and reliable results. Requires a 0.4-µL sample size. Apply blood to either side of the strip. The only strip that works with OneTouch® Verio®IQ Meter.

## ONETOUCH® ULTRA®

### OneTouch® Ultra®2 Blood Glucose Monitoring System

Fast and simple way to see the effects of food on blood sugar levels. Allows patient to view before- and after-meal averages. Provides results in only five seconds. Requires only a tiny speck of blood. For use with OneTouch® Ultra® Test Strips with DoubleSure® Technology, which automatically checks each blood sample twice. Features two-way scrolling buttons and a backlight for easy reading and operation. Stores up to 500 results. Includes OneTouch® Ultra®2 Meter (includes batteries), OneTouch® Delica™ Lancing Device, OneTouch® Delica™ Lancets and carrying case.

ITEM #	HCPCS	SOLD BY
0210980I	E0607	ea

### OneTouch® UltraMini® Blood Glucose Monitoring Systems

The OneTouch® UltraMini® is a small, fast and simple way to test your blood sugar. The meter is easy to learn and easy to use. It comes in five great colors — Limelight®, Pink Glow®, Silver Moon®, Purple Twilight® and Blue Comet®. Two-way scrolling buttons make it simple to review past results. Small enough for your purse or pocket. Simple three-step testing. Get accurate readings in five seconds.

	ITEM #	HCPCS	SOLD BY

## TRUE2GO®

### TRUE2go® Blood Glucose Monitoring System

No-coding monitor is easy to use — just twist and lock monitor onto the top of a vial of test strips and test. Provides accurate, precise results in as little as four seconds. Requires only 0.5 µL of blood. Alternate site testing increases flexibility. Features up to 99 test memory, Glucose Control Detection and automatic on/off. Strip release button eliminates handling of strips after testing. For use with TRUEtest™ Strips featuring Quad-Electrode Laser Technology, which promotes accurate results and first-test success. Kit includes TRUE2go® Blood Glucose Monitor with 3-volt battery installed, 10 TRUEtest™ Strips, lancing device, 10 sterile lancets, owner's booklet, quick reference guide, self-test logbook, compact carrying case and TRUEtest™ Glucose Control Solution. Lifetime warranty.

TRUE2go® Blood Glucose Monitor with 3-volt battery installed, 10 TRUEtest™ Strips, lancing device, 10 sterile lancets, owner's booklet, quick reference guide, self-test logbook, compact carrying case and TRUEtest™ Glucose Control Solution. Lifetime warranty.

ITEM #	HCPCS	SOLD BY
F4H0181	E0607	ea

## TRUERESULT®

### TRUEResult® Blood Glucose Monitoring System

No-coding monitor provides accurate, precise results in as little as four seconds. Easy to use, requires only 0.5 µL of blood. Increased flexibility through alternate site testing. Weekday display for easy reference of test results by day. Memory stores up to 500 test results with time/date and 7-, 14- and 30-day averaging. Features Glucose Control Detection. Four-testing reminders help promote testing compliance. Ketone test reminder prompts testing for ketone levels as appropriate. Automatic on/off. Strip release button eliminates handling of strips after testing. For use with TRUEtest™ Strips featuring Quad-Electrode Laser Technology, which promotes accurate results and first-test success. Kit includes TRUEResult® Blood Glucose Monitor with 3-volt battery installed, 10 TRUEtest™ Strips, lancing device, 10 sterile lancets, owner's booklet, quick reference guide, self-test logbook, compact carrying case and TRUEtest™ Glucose Control Solution. Lifetime warranty. Proven comparable to the leading name brand systems\*.

\*Accuracy Study of Blood Glucose Monitoring Systems: Evaluation of the TRUEResult®, OneTouch® Ultra®2, Ascensua® CONTOUR®, and FreeStyle Freedom® Lite systems.

ITEM #	HCPCS	SOLD BY
E4H0181	E0607	ea

### TRUEtest™ Strips

TRUEtest™ Strips feature Quad-Electrode Laser Technology, which promotes accurate results and first-test success. Innovative TRUEfill™ beveled-tip design allows for precise sample application. Require only 0.5 µL of blood for sampling. Easy-to-handle, flip-top cap remains attached to bottle for easy open. Strips are made in the USA. For use with no-coding TRUEResult® and TRUE2go® Blood Glucose Monitors.

ITEM #	HCPCS	SOLD BY
E3H0187	A4253	50/bx

### TRUEtest™ Control Solution

For self-testing and point-of-care testing of blood glucose. Use with TRUEtest™ Strips only.

ITEM #	HCPCS	SOLD BY

### ASSURE® PLATINUM

#### Assure® Platinum Blood Glucose Monitoring System

An auto code blood glucose monitor designed for long-term care use. Precise and accurate strip chemistry is augmented by auto code, which can reduce chances for user error. Feature-loaded and made for professional use, it helps keep facilities in compliance with state regulations. Features qcProGuard®; a 24-hour reminder to conduct daily control solution testing. A "hypo" warning alerts user to low blood glucose readings. Results are displayed in seven seconds on a large LCD with backlight. A strip release button for test strip disposal eliminates the need to touch a used test strip, reducing the risk of exposure to infectious materials. Designed with ProGrip® to help secure a hold on the monitor and reduce slipping on surfaces. Powered by two "AAA" batteries (included).

### GE DIABETES CARE (GG)

#### GE100 Blood Glucose Meter

Specially designed to provide an easier overall testing experience. Delivered in a convenient carrying case, the palm-sized meter has big buttons and an extra-large, easy-to-read LCD screen that displays results clearly. Keep track of and archive up to 500 results with 1-, 7-, 14-, 30- and 90-day averaging.

	ITEM #	HCPCS	SOLD BY
	99GM555GR1	E0607	ea

#### GE100 Blood Glucose Test Strips

Uses patented, noble metal technology and the latest in injection-molded nano-technology to deliver consistent, reliable and accurate results. Large plastic strips are designed to be easy to handle and easy to insert into the GE100 Blood Glucose Meter. Horizontal testing design allows for hygienic testing by having the blood sample placed on the side opposite from the hand grip.

Patented True Auto Coding Technology automatically calibrates the correct strip code as soon as the strip is inserted into the meter to provide accurate and precise results.

	ITEM #	HCPCS	SOLD BY
	99GS250G51	A4253	50/bx

### PRODIGY® DIABETES CARE (OP)

#### Prodigy® AutoCode Talking Meter

Requires no coding; insert the test strip into the strip port and it automatically powers on. Talks the user through the testing steps and speaks in English, Spanish, French and Arabic. Results are ready in seven seconds. The large display and talking component offer double confirmation of a reading. 450-test memory with date and time, and provides 7-, 14- and 28-day average. Compatible software is available online at no charge. USB port offers easy downloading and allows physician and patient tracking.

Small blood sample size makes it easy for a patient to utilize the alternate-site testing, which is approved for the fingertip, forearm, palm, upper arm, calf and thigh; making the testing process less painful. Box includes meter, two "AAA" batteries, carrying case, logbook, owner's manual and quick reference guide. Qualifies as an E2100 code for reimbursement for those needing the audible feature.

	ITEM #	HCPCS	SOLD BY
	51885	E0607/E2100	ea

#### Prodigy® Pocket Meter

Small, lightweight and convenient. No coding required. Insert test strip into strip port and it automatically powers on. Small blood sample size makes it easy for a patient to utilize the alternate-site testing, which is approved for the fingertip, forearm, palm, upper arm, calf and thigh, making the testing process less painful. See accurate results on large display in seven seconds. 120-test memory with date and time, and provides 7-, 14- and 28-day averaging. Compatible software available online at no charge. USB port offers easy downloading and allows physician and patient tracking. Box includes meter, one CR2032 3-volt battery, carrying case, logbook, manual and quick reference guide. Blue.

	ITEM #	HCPCS	SOLD BY
	050302B	E0607	ea

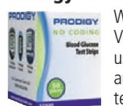

#### Prodigy® Voice Meter Kit

Fully audible from setup to testing. Provides results in seven seconds and speaks in English. No coding required. Insert test strip into strip port and it automatically powers on. Raised, imprinted buttons make it easy to navigate for the blind. The Repeat button replays the last message or test result. Small blood sample size makes it easy for a patient to utilize the alternate-site testing, which is approved for the fingertip, forearm, palm, upper arm, calf and thigh; making the testing process less painful. Stores up to 450 audible test results with date and time, and provides 7-, 14-, 21-, 30-, 60- and 90-day averages. Compatible software is available online at no charge. USB port offers easy downloading and allows physician and patient tracking. Kit includes meter, two "AAA" batteries, carrying case, control solution, Prodigy® test strips (10 count), lancets (10 count), lancing device, logbook, owner's manual and quick reference guide. Qualifies as an E2100 code for reimbursement for those needing the audible feature.

	ITEM #	HCPCS	SOLD BY
	51900	E0607/E2100	ea

#### Prodigy® No Coding Blood Glucose Test Strips

Work with the following Prodigy® meters: AutoCode, Pocket and Voice. The new three-lead technology allows the meter to notify the user if there is not enough blood in the test strip. The capillary action automatically draws blood sample into test strips. Do not use GDH-PQQ technology and are approved for alternate-site testing.

	ITEM #	HCPCS	SOLD BY
	52800	A4253	50/bx

### BECTON DICKINSON (58)

#### LANCETS

#### BD Microtainer® Contact-Activated Lancets

At 30 gauge, it's the thinnest safety lancet and demonstrates significantly less pain. Ergonomic design for a secure, comfortable grip. Perfect for children, seniors and those with dexterity challenges. Self-contained, activate on contact, no button to push. Automatic retraction of needle prevents reuse. Protects against accidental needlestick injuries and cross-contamination. Meets OSHA requirements for needlestick safety.

	ITEM #	HCPCS	SOLD BY

# DIABETES INSULIN DELIVERY SYSTEMS

## TANDEM DIABETES CARE (TN)

### t:slim® Insulin Pump

Vivid color touch screen is the window to a streamlined, easy-to-use interface that places everything users want at the fingertip. The pump is simple to learn, simple to use and is the smallest insulin pump, yet can hold 300 units of insulin. With its slim, compact design, it can be slipped into a pocket or worn discreetly under clothing. With the footprint of a credit card and the look of a smart phone, its glass, chrome and glossy exterior invite comparison with today's most popular handheld devices. Includes all of the smart features other pumps offer, such as bolus calculator, insulin on board and extended bolus, but they're designed to be easy to find and easy to use. Uses a unique Micro-Delivery™ Technology designed with safety in mind. It provides precision dosing down to 0.001 units and exceptional safety features not found on other pumps. The pump has an integrated micro-USB port for easy, convenient charging and data transfer. It is the first pump powered by the latest rechargeable technology, eliminating the need for disposable batteries. The t:connect® Diabetes Management Application's is the MAC-and-PC compatible software companion to the t:slim Pump.

## INSULIN PUMPS & ACCESSORIES

### OneTouch® Ping® Glucose Management System

First full-featured insulin pump that wirelessly communicates with a blood glucose meter-remote. Allows user to calculate insulin doses and opt to wirelessly instruct the pump to deliver insulin without touching the pump. Can be clipped to a belt, tucked in a pocket or secured under clothing. Waterproof up to 12' for 24 hours.<sup>1</sup> The pump screen is self-illuminating and high contrast for readability and viewable from a wide angle. Delivers low basal increments (0.025 U/hr) and low bolus increments (0.05 U) to precisely match insulin needs. Compatible with ezManager® MAX Diabetes Management or Diasend® Software to allow users to download important diabetes management data from the pump and meter-remote. Utilizes OneTouch® Ultra® Test Strips (Item # (70)020244). Replacement battery available (Item # (CB) SPAAKAM).

<sup>1</sup>Meter-remote cannot be exposed to water.

## MEDTRONIC MINIMED (MN)

### CONTINUOUS GLUCOSE MONITORING SYSTEMS

#### MiniMed® 530G with Enlite®

The MiniMed 530G with Enlite is a breakthrough, first-generation artificial pancreas system with Threshold Suspend automation for people with diabetes. Medtronic's system is the first system that takes action when needed and can automatically stop insulin delivery when sensor glucose values reach a preset level and the patient doesn't respond to the Threshold Suspend alarm. The MiniMed 530G system incorporates the new Enlite sensor, Medtronic's most accurate and comfortable continuous glucose sensor. Other pump displays include alerts for predicting highs and lows, rapidly changing glucose levels, glucose trends, current glucose levels, and insulin therapy and safety information. Available in two different sizes to fit user's insulin needs, a 180-unit (1.8-mL) reservoir and a 300-unit (3-mL) reservoir. The pump is compatible with CareLink® Personal Therapy Management Software that allows user to download important diabetes management data wirelessly from the pump. MiniMed Insulin Pumps are sold with a compatible linking meter.

## INSULIN PUMPS & ACCESSORIES

### MiniMed Paradigm® REAL-Time Revel™ System

The MiniMed insulin pump with built-in continuous glucose monitoring is the first insulin pump to offer continuous glucose monitoring readings right on the insulin pump screen. Pump displays include alerts for predicting highs and lows, rapidly changing glucose levels, glucose trends, current glucose levels, and insulin therapy and safety information. Designed for ease of use, Medtronic's patented Bolus Wizard® Calculator automatically calculates user's insulin requirements and guides him or her through bolus delivery in a minimum number of steps using large, easy-to-read text and numbers. Available in two different sizes to fit user's insulin needs, the Revel™ insulin pump holds a 180-unit (1.8-mL) reservoir, while the Revel™ insulin pump holds a 300-unit (3-mL) reservoir. Compatible with CareLink® Personal Therapy Management Software that allows user to download important diabetes management data wirelessly from the pump. Glucose Sensors and MiniLink™ Transmitters sold separately. MiniMed Insulin Pumps are sold with a compatible linking meter.

## ROCHE HEALTH SOLUTIONS (DI)

### INSULIN PUMP & ACCESSORIES

#### ACCU-CHEK® Combo Insulin Pump System

Designed to make insulin delivery easy, quick and discreet, the ACCU-CHEK Combo insulin pump system uses Bluetooth® technology to provide two-way wireless communication, allowing users to control the ACCU-CHEK Spirit Combo pump with the ACCU-CHEK Aviva Combo "smart meter." From this "smart meter," users can control nearly all device functions without having to touch the pump, including test their blood glucose levels, calculate and administer a bolus dose, program basal and temporary basal rates to easily adjust to changing conditions, check and clear alerts, as well as set and act on customizable reminders. The system has the largest available cartridge size in the market, holding up to 315 units of insulin, and provides flexibility to adjust basal rate to as low as 0.05 units/hour in increments as precise as 0.01 units. Provides a full-color display, customizable bolus adviser, three user menus and a menu-driven user interface along with customizable reminders. The meter uses ACCU-CHEK Aviva Plus test strips, which offer advanced accuracy – important for insulin users. Replacement three "AAA" alkaline batteries available.

#### ACCU-CHEK® LinkAssist Insertion Device

For virtually painless insertion and consistent placement of the ACCU-CHEK® Ultraflex infusion set. Features an open base with viewing window that allows user to see the insertion site. Automatic safety lock and single-release button allow easy and safe activation with only one finger. Ideal option for those with vision or dexterity issues, caregivers or those who prefer assistance inserting their infusion set.

ITEM #	HCPCS	SOLD BY
04530039001	E1399	ea

#### ACCU-CHEK® Tender Infusion Sets

Provide maximum insertion control and wearing comfort. Variable insertion angle (20° – 45°) for optimal, site-specific placement depth. Multiple cannula lengths for optimal fit with body type and infusion site. Flexible cannula for round-the-clock comfort. Feature a window in base unit for viewing infusion site. Angled insertion ensures controlled, two-handed, manual insertion. Include Soft Teflon® cannula; 27-gauge insertion needle; 25-gauge cannula; at-site connector; 13-mm or 17-mm cannulas; and 24", 31" or 43" tubing. Hypoallergenic, skin friendly and self-adhesive. ACCU-CHEK® Tender I packaging includes 10 complete sets. ACCU-CHEK® Tender II packaging includes 10 complete sets with 10 additional cannula "heads" to allow use of two cannulas for each tube set, saving money on primed insulin and the time it takes to prime the tubing.

## SMITHS MEDICAL (DL)

#### Cleo® 90 Infusion Sets

Single-use, disposable infusion sets have 28-gauge intro needle and 25-gauge cannula. Unique, all-in-one design includes an inserter needle and automatic needle retraction to reduce accidental needle sticks and make insertions convenient and quick. Cannula and secure, skin-friendly adhesive attach to skin with just one simple push of the canister. Low-profile, 360°

Flex-Attach™ site connector system can place the tubing in any direction and is nearly invisible under clothing. Industry-standard Luer connection is compatible with almost any insulin pump.

# DIABETES INSULIN DELIVERY SYSTEMS

## INSULET (OM)

### OmniPod® Personal Diabetes Manager Starter Kit

Tubing-free OmniPod® System simplifies pump therapy with only two parts that integrate the reservoir, infusion set and inserter. Designed to be worn almost anywhere on the body, the small, waterproof Pod delivers up to 200 units of U-100 rapid acting insulin. Hands-free, automated insertion is virtually pain-free; and because the Pod is tubing-free, there is nothing to snag, tangle or disconnect, making insulin therapy truly continuous. User-friendly, handheld PDM (Personal Diabetes Manager) wirelessly programs insulin delivery and has a convenient, built-in blood glucose meter. Additional features include a suggested bolus calculator, food library and customized alerts. PDM also stores and summarizes insulin delivery, blood glucose and carbohydrate records. OmniPod® Starter Kit contains one PDM, one soft carrying case and one user guide.

ITEM #	HCPCS	SOLD BY

## ACCESSORIES

### BD Safe Clip Clipper Device

Clips off the needle to ensure that used syringes don't injure anyone. After being clipped by the device, the needle is automatically and safely retained within the clipper. Can hold up to 1,000 clipped needles.

ITEM #	HCPCS	SOLD BY
328235	A4649	ea

### BD Magni-Guide® Device

Works as both an insulin syringe scale magnifier and a needle guide. The insulin vial snaps onto the end, and a groove in the device allows the needle to be easily guided into the vial stopper. The device not only helps user hold the syringe and the vial together, but also magnifies the syringe scale 1.7 times for easier reading. Fits both ½-cc and 1-cc syringes.

ITEM #	HCPCS	SOLD BY

#### TRUEplus™ Single-Use Insulin Syringes

LATEX FREE

An easy and comfortable way to deliver insulin. Sterile, UNIBODY one-piece needle and syringe with large, clear unit markings. Available in a variety of sizes and gauges. According to a recent quality study, TRUEplus™ Syringes deliver comparable quality, comfort, and ease-of-use to the leading national brands.\*

\*Technically Advanced Quality Assurance Evaluation Report, conducted by UL-STR, 2013. TRUEplus™ Single-Use Insulin Syringes (28- and 31-gauge) received a top score of 10 out of 10 and were rated comparable to same gauge syringes from BD, Monoject, and Ulticare.

## DIABETES CONTINUOUS GLUCOSE MONITORING

### MEDTRONIC MINIMED (MN)

#### CONTINUOUS GLUCOSE MONITORING SYSTEMS

##### MiniMed® 530G with Enlite®

**NEW**

The first system that takes action when needed and can automatically stop insulin delivery when sensor glucose values reach a preset level and the patient doesn't respond to the Threshold Suspend alarm. Incorporates the new Enlite sensor, Medtronic's most accurate and comfortable continuous glucose sensor. Other pump displays include alerts for predicting highs and lows, rapidly changing glucose levels, glucose trends, current glucose levels, and insulin therapy and safety information. Available in two different sizes to fit user's insulin needs, a 180-unit (1.8-mL) reservoir and a 300-unit (3-mL) reservoir. The pump is compatible with CareLink® Personal Therapy Management Software that allows user to download important diabetes management data wirelessly from the pump. MiniMed Insulin Pumps are sold with a compatible linking meter.

##### MiniLink™ REAL-Time Starter Kit

Used with both the Paradigm® Insulin Pump and the Paradigm® Revel Insulin Pump to provide a simple and integrated CGM solution for those on insulin pump therapy. Helps protect users from dangerous glucose levels by providing access to real-time glucose readings, glucose trend graphs and arrows, and customizable safety alarms.

Trend graphs are conveniently displayed on the insulin pump screen to help identify glucose patterns over a 3-, 6-, 12- or 24-hour time period. For additional safety, users with the Revel insulin pump can set predictive alerts, which can provide a warning up to 30 minutes before a high or low glucose limit is reached. Customizable alert settings based on needs. Glucose sensors can be worn up to three days and are easily inserted using an automatic insertion device. Includes MiniLink Transmitter, 10 glucose sensors, Sen-serter® insertion device, 10 transmitter adhesive patches and 10 IV3000\* adhesive dressings.

##### Guardian® REAL-Time Continuous Glucose Monitoring Systems

The Guardian® REAL-Time CGM system provides access to real-time glucose readings, safety alarms and glucose trend data around the clock. Trend graphs are conveniently displayed on the monitor to help identify glucose patterns over a 3-, 6-, 12- or 24-hour time period. Sensor can be worn up to three days at a time and are easily inserted using provided automatic

insertion device. The transmitter sends data to the Guardian Monitor that is small, comfortable and easy to wear. Glucose sensor attached to transmitter is watertight\*\*. Kit includes MiniLink® REAL-Time transmitter, Sen-serter® insertion device, 10 transmitter adhesive patches and 10 IV3000\* adhesive dressings.

### DEXCOM®, INC. (ED)

##### Dexcom® G4® PLATINUM Continuous Glucose Monitoring System

**NEW**

The first CGM with vivid trend colors for easy viewing of glucose highs and lows. At 2.4 oz, is the lightest CGM and slips easily into a coin pocket. Transmitter on user's body can send glucose signals up to 20' to the receiver. Comes with customizable tones and melodies for high and low alerts and has the only sensor on the market approved for up to seven days of use for added value and convenience.
