

Phenomenal Products from PlastiForm Concrete Forming Systems

Article Courtesy of PlastiForm Concrete Forming Systems

Welcome to PlastiForm Concrete Forming Systems the ORIGINAL HDPE non-stick bendable and reusable all plastic forming system. Use for STRAIGHT WORK OR RADIUS WORK! ELIMINATE NAILING with our boards and accessories that have been used since 1984 and some are STILL BEING USED! We

carry the original system that has been used all over the world to build places like Disneyland, World, Point Magu, Andrews Air Force Base, Suzuki Corporation, numerous municipalities and thousands of other projects. Most recently, The PlastiFormR products have been sold under Green Plastics. I liked the products so much, I bought the company!

The forms come in board sizes 2x4,

2x6, 2x8, 2x10, and 2x12 in 12 or 16 foot lengths. They carry accessories that connect the boards to each other in a snap and connect to stakes with a twist of the wrist by using special CAMLOCKS. Place camlocks anywhere along the dovetail slot that runs the full length of the back of the boards. It makes setting up, pouring and breaking down super quick and easy! You can STRIP FORMS AS SOON AS CONCRETE WONT

SLUMP!

Our standard boards have a 10 year guarantee and our Premium USA MADE boards are guaranteed for life! They cost about 4 times the price of wood but can save you money in the long run. They will last for years without rusting, knotholes, warping, splintering, splitting, peeling, swelling, rotting and are impervious to chemicals! This makes it possible to use

colored cement or stains without harming the boards!

They weigh 1/4 the weight of wood and 1/10 the weight of metal forms! This makes it easy to save trips and gas for your trucks (you can use smaller trucks too) and saves man power and their

backs. It is FASTER TO USE because there's no toenailing and you'll see a savings of 50 to 75 percent of the time because it is so easy to put together and take apart. The only time you use a hammer is to put in the stakes! Adjust elevations in seconds. Use as a marker for drain lines. The dovetail slot is a perfect finger hold for use as a screed.

It is easy to bend to make the EASI-

EST CURVES in the world. The 2x4's have a radius of 3 feet and the 2x6's a radius of 4 feet. Boards will return to their flat form for easy stacking or reuse. Wipe, rinse with a hose or power washer or bend it to flake off dried cement after use. Use a little form oil on it before the pour and it will be absolutely non-stick. It leaves a nice glasslike finish when stripped.

EASY CUT for steps and super tight curves. We can supply VERSATILE CORNER ANGLES that will swing 270 degrees for inside or outside corners or anywhere in between.

Come by our Booth #6472 and let us show you this phenomenal product that will SAVE YOU TIME, MONEY, LABOR AND TREES and will actually MAKE YOU MONEY!
