## UV Coaters

**Glass-19 & Glass-25**

**SUV-18 & SUV-24**

**SUV-24Plus**

Shark Finishing Machinery introduces to its Smart line of digital print finishing machinery a variety of coating options. We offer standard UV Coaters as well as a line of GLASS™ coaters. Our glass coaters are unlike any other coater on the market today by offering a Glass like finish that is glossy enough to be mistaken for lamination. The SUV-24 PLUS offers this unique glass like finish as well as a “soft touch” finish. These are one-of-a-kind machines that are competing with the lamination industry. Now you can offer a lamination like finish at a fraction of the cost and time of lamination. These coaters are all low-maintenance, ultra-violet light, curing coating systems, which provide a durable and high-quality finish to your printed sheets with outstanding results on both offset and digitally printed stock. All of our coaters use traditional UV coating liquid.

- For Offset and Digital
- Uses traditional UV liquid
- Several sizes available
- Maximum thickness up to 0.09”
- Maximum length – NO LIMIT
- Variable Speed
- Easy clean-up
