

Plaxco Staffing LLC

Medical Care for Injured Worker

At Plaxco Staffing LLC prompt medical attention is an important priority. Please consider the type of injury before referring the injured employee to a hospital or clinic. In the event of a life threatening injury that requires emergency care, please contact 911 or your local emergency provider. For all other work related injuries or illness, the best option for providing an employee with quality cost-effective injury care is occupational clinics. These clinics provide immediate injury care and no appointment is necessary. In addition, several other services are provided, such as post accident drug screens, physical therapy and return to work programs.

In an effort to provide you with the best healthcare options, Plaxco Staffing LLC has accounts with both Concentra Medical Centers and U.S. Healthworks. Both companies have several locations throughout the United States, so please use the links indicated on the right to find the clinic closest to your injured employee. (Note that on the Concentra home page, select the tab labeled Location Finder to take you to the clinic locations.)

Please make sure to notify the clinic that the employee is on his way. It is also important to request a post accident drug screen and to inform them that this is a Plaxco Staffing LLC claim.
