FEEDING DIRECTIONS

The fiber sources in Patriot Mare & Foal are highly digestible in horses and contribute significantly to the digestible energy content of this feed. Feed foals and weanlings 0.5-1.0% of body weight per day of Patriot Mare & Foal in at least two feedings along with good-quality hay. Feed 5-6 lbs of Patriot Mare & Foal to an average-sized, mature broodmare (900-1200 lbs) along with at least 20 lbs of good-quality forage divided into at least two meals each day. Adjust feeding rate for each individual horse to maintain the desired body condition. If your horse needs less than 5 lbs of Patriot 16-P to maintain condition, provide a GROSTRONG® Vitamin and Mineral product according to label directions. If more energy is required when feeding 6 lbs of Patriot Mare & Foal, add MOORGLO® or HEALTHY GLO® Premium Hi-Fat Supplements from the Forage First™ Nutritional Pyramid. GROSTRONG Mineral products should also be offered to broodmares and foals on a free-choice basis. Provide clean, palatable water at all times, except directly following heavy exercise. See bag for additional details. For more information, call 1-800-680-8254.

WARNING: This feed contains copper. Do not feed to sheep or other copper sensitive species. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.
