Ballet	Ballet is the technical foundation for all other dance genres and aims to create graceful visual entertainment. We emphasize technical precision, posture and alignment, style, and theory.						
Tap	Tap dancing is concentrated in the feet and ankles with complementary action from the arms, head, and other parts of the body. Metal taps are worn on tap shoes to create percussive sound in rhythm of the dance steps performed.						
Hip-hop	Derived from street dancing, Hip-hop classes emphasize controlled, isolated movements performed with high levels of energy and in a stylized manner.						
AcroDance	AcroDance classes present students with a chance to learn and safely practice basic tumbling feats that they may encounter in the choreography for their dance classes. Classes may cover forward and backward rolls, cartwheels, round-offs, handstands, headstands, backbends, and so forth.						
Jumps/Leaps/Turns	"JLT" class offers an opportunity to work exclusively on the proper technique, execution, and brilliance of various "tricks" at the appropriate skill level of the class.						
Music Fun Time	The Music Fun Time curriculum is specially designed to teach young children music theory, including reading music and basic piano performance in an individualized, small group setting.						
Roos & Joeys	'Roos & Joeys class is an enjoyable way to interact and bond with your little "Joey" as they are exposed to rhythm, movement, coordination, as well as the social protocol of a "classroom" setting. 'Roos & Joeys class is also a great introduction to music and dance for children who plan to eventually enroll in pre-K dance lessons.						
Guitar/Piano/Voice	Work one-on-one to learn Guitar/Piano/Voice performance, music theory and technique.
