Oversize Common Carrier Delivery

All orders with any quantity of shades or blinds or any continuous valance 96" or more in width are considered oversize. Therefore, a net shipping charge of \$95.00 per order will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

FEATURES & BENEFITS

- Woven Wood shades are offered in a wide selection of natural material styles featuring unique patterns and rich tones.
- Decorative Woven shades feature two collections. Canopy shades are woven out of natural fibers and exotic yarns. Tropicale shades provide a natural look, yet are constructed of unique man-made fibers for a consistent appearance.
- Durable Wood Headrail System comes pre-routed for easy installation.
- Standard swivel multi-cord lock and guided pulley system ensures smooth, long-lasting operation.
- Matching valance available in customized lengths, conceals the operating system. Woven Wood shades feature a built-in stabilizer on outside mounts.
- Antique brass finish and brackets complements the shade's natural appearance.
- Available with upgraded operating systems including top-down/bottom-up, continuous loop, cordless lift, and RemoteLift motorization for enhanced control convenience.
- Unique light and privacy controls such as TriLight Shades and Tandem provide versatile operating flexibility.
- Optional operable privacy liners or optional fixed privacy liners provide additional light control features including light filtering, room darkening and a neutral outside appearance.
- Optional twill edge-bindings and faux silk bindings frame the shade and valance using a high-quality process, and add a finishing touch.
- Limited Lifetime Warranty ensures your customers' satisfaction.

IMPORTANT NOTE ABOUT NATURAL WOVEN MATERIALS:

Our Woven Wood shades are uniquely constructed from natural bamboo, reeds, jutes, rattan, grasses and woods. Many materials, such as natural grasses, are hand tied and braided with expert care. Each woven wood shade is one of a kind. **Slight cracks, wood imperfections and variations in color are all inherent in natural products and are not considered flaws.**

Woven Wood shade material may stretch slightly over time and with use depending on the material style. The average stretching amount is approximately 1/2" for every 3 feet of shade length plus or minus 1/4".

The irreplaceable feature and beauty of the Natural Woven Shades is it's unique variation in the material.

SHADE CONFIGURATION DIAGRAM

Shades and Individual Valances Are Built on 1 of 3 Headrail Depths:

1-1/2" Headrail Depth: Standard Rectangular, Waterfall Style, Top-Down, Top-Down/Bottom-Up & Turned Headrail
 2-1/2" Headrail Depth: RemoteLift, Continuous Cord Loop, Operable Liner, 2 or 3 on 1 Headrail & Individual Valances
 3/4" Headrail Depth: For narrow mounts

OUTSIDE MOUNT (& CEILING MOUNT) VALANCE WIDTH ADDITIONS FOR:
Standard, Top-Down, Top-Down/Bottom-Up & RemoteLift Shades (see next pages for Cord Loop and Cordless Lift Shades)
 A small width addition is made to the valance to create a "cornice style" box for approved appearance & shade operation/stacking.
 Valance Width ADDITION = +1/2" "PER SIDE = +1" Total

VALANCE RETURN STABILIZER (VRS) SYSTEM

Outside mount shade valances come with the innovative Valance Return Stabilizers (VRS) System. The VRS System includes clear corner pieces and are attached to the valance and returns, keeping them stable and in perfect alignment. The valance also covers the front edge of the returns. A tiny spring mechanism in each VRS keeps the valance hanging straight down off the headrail, while also allowing you to raise the valance for installing the shade and for periodic dusting/cleaning underneath.

Not Available on Decorative Wovens

LIMITED LENGTH ADJUSTER

Woven Wood shade configurations that have a bottom dowel will include a Limited Length Adjuster. Shades that have a edge-binding or tape-binding on the bottom will NOT include the adjuster. The Limited Length Adjuster allows up to a 1" shade height reduction (depending upon the dowel size and woven material). It works by simply **SLIDING UP** the Adjuster on each side of the shade which in turn rolls the dowel up. This is an innovative solution to adjust for some woven shade stretching, which may occur to some extent over time with all woven wood materials.

Not Available on Decorative Wovens

CORD LOOP SHADE DIAGRAM

INSIDE MOUNT WIDTH DEDUCTIONS FOR: Cord Loop Shades

Minor adjustments are made to the standard IB width deductions for cord loop shades to improve the cord loop operation. These adjustments allow the loop control, cord loop and safety tensioner to be shifted toward the outside edge of the shade.

Headrail & Valance Width DEDUCTION = **-1/4" (STANDARD) IB WIDTH DEDUCTION ON BOTH SIDES = -1/2" Total**

Shade Panel Width DEDUCTION = **-1/4" (ADJUSTED) IB WIDTH DEDUCTION ON BOTH SIDES = -1/2" Total**

OUTSIDE MOUNT (& CEILING MOUNT) WIDTH ADDITIONS FOR: Cord Loop Shades

Minor adjustments are made to the standard OB width additions for cord loop shades to improve the cord loop operation. These adjustments allow the loop control, cord loop and safety tensioner to be shifted toward the outside edge of the shade.

Headrail Width ADDITION = **+1/4" ON BOTH SIDES = +1/2" Total**

Valance Width ADDITION = **+3/4" ON BOTH SIDES = +1-1/2" Total**

CONTINUOUS CORD LOOP SYSTEM - MOUNTING AND WIDTH ADJUSTMENTS NOTES

Continuous Cord Loop Systems offer manually operated clutch mechanisms for raising and lowering shades. By simply putting on one side of the cord loop, shades can be quickly and precisely positioned. Left or Right side control positions may be specified.

Cord Loop shades are installed with special L-shaped (small roller shade cassette headrail style) mounting brackets, which snap into a flat, custom fit connector pre-attached to the headrail. This cord loop bracket system allows the cord loop mechanism to be shifted to the very edge of the headrail so that the cord loop is shifted toward the edge of the shade, rather than hanging in front of the shade. The width adjustments made on the cord loop control side allow the cord loop to hang straight down to the required, mounted safety tensioner and clear the edge of the woven material.

CORDLESS LIFT SHADE DIAGRAM

INSIDE MOUNT WIDTH DEDUCTIONS FOR: CORDLESS LIFT

Headrail & Valance Width DEDUCTION = $-1/4"$ (STANDARD) IB WIDTH DEDUCTION ON BOTH SIDES = $-1/2"$ Total
Shade Panel Width DEDUCTION = $-1/4"$ (ADJUSTED) IB WIDTH DEDUCTION ON BOTH SIDES = $-1/2"$ Total

standard $-1/4"$ IB width deduction to headrail, fabric and valance ON BOTH SIDES

OUTSIDE MOUNT AND CEILING MOUNT WIDTH ADDITIONS FOR: CORDLESS LIFT

Headrail Width ADDITION = $+1/4"$ ON BOTH SIDES = $+1/2"$ Total
Valance Width ADDITION = $+3/4"$ ON BOTH SIDES = $+1-1/2"$ Total

adjusted $+1/4"$ OB width addition to headrail ON BOTH SIDES

adjusted $+3/4"$ OB width addition to valance ON BOTH SIDES

NOTE: The adjusted OB width additions to the headrail ($+1/4"$ on each side).

Valance and returns attach with the VRS system (Woven Woods only) which then adds the (standard) $+1/2"$ beyond the headrail width on each side.

CORDLESS LIFT SYSTEM – MOUNTING AND WIDTH ADJUSTMENT NOTES

Cordless Lift shades are installed with special L-shaped (small roller shade cassette headrail style) mounting brackets, which snap into a flat, custom fit connector pre-attached to the headrail. Cordless Lift shades do not install with the standard woven wood screw-post brackets through routes in the headrail.

FEATURE & OPTION NOTES:
- Continuous Cord Loop shades, Cordless Lift Shades, RemoteLift shades and Individual Valances are made with the larger 2-1/2" depth headrail. - Wider shades may also come with ceiling mount bracket(s) used to support the center headrail area. Flat (T-Style) brackets may also be ordered by request. - Custom shade valance heights may be specified to 12" at NO extra charge. Over 12" valance is charged EXTRA. - Returns standard on OB shades and valance orders ONLY, unless specified. Return widths are 1-3/4" (for small HR) and 2-3/4" (for large HR). - Either of 2 size wood dowel bottomrails are wrapped with the selected woven material. Dowel size used depends on material style - see dowel charts on pages 3-4. - Top-Down and TDBU shades require an EXTRA LONG lift cord and come with a CORD CLEAT to wrap excess cord. These shades are built on 1-1/2" depth headrail. For 2 on 1 and 3 on 1 TDBU shades over 96" are built on a 2-1/2" headrail. - Waterfall-Style shades may be motorized. They are not available in Top-Down or Top-Down/Bottom-Up. - Widths over 96" will always receive a spliced valance split at the shade gap. There is a 1/2" gap between individual shades. Cord Loop, Cordless, Simplicity Motorization shades are not available with 3 on 1 headrail. - Cut-Out maximum size is 3" x 4" and only available on the Left or Right <u>bottom</u> of shade. Cut-Outs are NOT available when Edge-Binding, Twill Edge-Binding or Faux Silk Binding is ordered, or on operable liners.

FINISHED DIMENSION & MOUNTING NOTES

Note: Ceiling mount shades are OB by default and have the same finished dimensions. IB shades may also be "TOP" mounted using the standard L-style brackets or using the optional Flat brackets.

* OB Valances and returns are attached using the Valance Return Stabilizer (VRS) System. The OB valance width additions indicated above create a "cornice style" box for improved appearance and operation (Woven Wood patterns only).

** The flush mount depth requirements indicated above include space for the woven material attached to the front (valance) and back (shade) sides of the headrail. These are AVERAGE depths as the different woven wood materials have varying degrees of thickness. Verify your individual shade's depth before mounting, then position brackets accordingly for an EXACT flush mount.

Note: Add an extra +1/2" to the mounting depths for standard and waterfall shades with operable liner.

SMART FACTS

POSITIONED AS ALL SHEER

POSITIONED HOWEVER YOU DESIRE

POSITIONED AS FULL SHADE

- The beautiful combination of a sheer pleated shade on top and woven shade on the bottom provides maximum versatility in a single window covering.
- Performs like a top-down/bottom-up shade, but the sheer pleated shade offers more benefits: diffuses harsh light entering the room; offers moderate privacy during the day; protects furnishings from harmful UV rays.
- Four sheer pleated styles are available in multiple colors to meet most decorating tastes.
- Shade is built on the large 2-1/2" depth stained wood headrail for durability and easy installation.
- The hardware system uses the same quality components as the top-down/bottom-up woven shade.
- The standard cordlock lifts and lowers the shade with ease. The right cord operates the middle rail and the left cord operates the bottomrail.
- The headrail and operating system is hidden by a 6" valance on the front and back side of the shade for a clean interior and exterior appearance. Included on both inside (IB) and outside (OB) mounts. Custom valance heights to 12" at no extra charge.
- The woven panel is available with a fixed privacy lining. When shade is ordered with the optional fixed liner, the valances will also include a liner.

SELECTING A TRILIGHT SHADE

1. Choose a woven style and color for the bottom shade.
 2. Choose a sheer pleated fabric for the top shade. See Color Chart.
 3. Refer to the woven price grids on pages 5-13 to determine your woven wood shade price.
 4. Refer to the sheer pleated grids A on page 32 to find your top shade price. Then simply add the prices (by shade size) of the sheer pleated fabric and woven material together to determine your final price.
- > TriLight Shades are available as a standard rectangle only.
 - > Standard control system—right operates the intermediate rail; left operates the bottomrail. (Note: grouped controls not available.)
 - > Fixed liners are available for the bottom woven shade.

TRILIGHT OPTIONS & CONFIGURATION SPECIFICATIONS

OPTIONS: NO EXTRA CHARGE

- **Extension Brackets**
- **Spacer Blocks**
- **Special Cord Length** – Standard length is approximately 1/2 the height of the shade

TRILIGHT – STANDARD

Shade is built on the large 2-1/2" depth wood headrail.
Standard operating controls: Right operates the intermediate rail;
left operates the bottomrail. Grouped controls are not available.

TriLight Shades	LARGE Headrail
MINIMUM WIDTH	22"
MAXIMUM WIDTH	84"
MINIMUM HEIGHT	12"
MAXIMUM HEIGHT	96"
MAXIMUM AREA (SQ/FT)	48 to 72 sq/ft*

- TriLight shades are built on the large 2-1/2" depth headrail.
- TriLight shades are NOT available as 2 or 3 on 1 headrail.
- TriLight shades are not available with twill edge-binding, faux silk binding or operable privacy liners. TriLight shades ARE available with fixed liners on the woven panel.
- TriLight shades maximum width is dependent on the maximum width of the ordered Pleated TOP panel fabric which is 84" wide.
- TriLight shades are only available with SPLIT controls (grouped controls are not available).
- Cut-outs are not available on TriLight shades.

* TriLight shades maximum area (sq/ft) is dependent on the ordered woven material. Heavier materials are limited to 48 sq/ft, medium to 60 sq/ft and light to 72 sq/ft.

FINISHED DIMENSION & MOUNTING NOTES

Note: Ceiling mount shades are OB by default and have the same finished dimensions. IB shades may also be "TOP" mounted using the the standard L-style brackets or using the optional Flat brackets.

** The flush mount depth requirements indicated above include space for the woven material attached to the front (valance) and back (shade) sides of the headrail. These are AVERAGE depths as the different woven wood materials have varying degrees of thickness. Verify your individual shade's depth before mounting, then position brackets accordingly for an EXACT flush mount.

* OB Valances and returns are attached using the Valance Return Stabilizer (VRS) System for woven wood only. The OB valance width additions indicated above create a "cornice style" box for improved appearance and operation.

SMART FACTS

- Innovative design allows choice of woven shade fabric for the front shade to achieve just the right style and color desired.
- The back liner roller shade offers total flexibility when controlling light and privacy.
- The back liner also provides an extra layer of insulation to help reduce energy costs.
- Liners are available in light-filtering, blackout and screen styles to fit varying needs.
- Optional side seals eliminate light leaks from the sides of shades. They fit neatly inside the window frame and are hidden behind the front shade so they don't detract from the beauty of the shade.
- Optional side seals provide additional energy efficiency. Together with the back liner, they form a complete barrier between the window and the room — keeping rooms cooler in summer and warmer in winter.

SELECTING A TANDEM SHADE

1. Choose a woven style and color.
 2. Choose a liner (back roller shade) style and color. See Color Chart.
 3. Refer to the woven price grids on pages 5-13 to determine your woven shade price. Add in the Tandem option pricing found on the next page to determine the final shade price.
- Tandem woven is available as a single rectangular shade with standard controls only
 - Right cordlock operates the front shade; cord loop operates the back liner. Shades operate independently of each other.
 - Reverse controls available; no grouped controls
 - Side seals available as a surcharge option
Note: Available colors 973 Oyster and 661 White

SIMPLICITY RECHARGEABLE MOTORIZATION: OVERVIEW

Simplicity Rechargeable

- The Rechargeable Simplicity motor program features an integrated rechargeable lithium ion battery in the motor casing and is fully concealed by the inner tube.
- Rechargeable battery is included with the motor. The average battery charge will last 6-12 months based on an average sized shade raised and lowered once per day. The life of the battery charge will vary based on the type of window covering selected, the size and weight of the window covering and the number of times the shade is operated on a daily basis. The battery can be recharged up to 500 times. It takes approximately 5 hours to recharge the motor when fully depleted.

Battery Charger

- An 8.4 Volt charger requires a standard power outlet to recharge the battery. The charger must be specified when ordering Simplicity Rechargeable Motorized shade option. The charger plugs into the charging port of the motor. The charger is black and comes with a 156" wire. The dimensions are 1" wide x 2-1/2" length x 1-3/4" deep. Sold separately.

Solar Panel Recharge Option

- Plugs in to any Simplicity Rechargeable motorized shading. Provides constant trickle charge to 7.4v Li-ION Rechargeable battery packs. Does not require direct sunlight, but performs best in regular direct sunlight applications. Will prolong the life of the charge of the 7.4v rechargeable battery packs, and in some applications will maintain charge indefinitely.
- Life of charge is subject to application variables such as, size and weight of shade, frequency of use, amount of direct sunlight exposure, etc.

5 Channel Remote

- The remote can operate up to five shadings simultaneously, individually or in groups. Remotes and holders are available in white or black. The remote comes with a holder which can be mounted to a wall for easy storage. The range of the remote is approximately 80 feet.

Please Note:

- Not all motors run at the same rate of speed.
- Simplicity motors have a "Favorites" position setting. To set a "Favorites" position, follow instructions provided in the installation instructions.

REMOTELIFT™ MOTORIZATION: OVERVIEW

With our RemoteLift™ motorized shades, tasks such as adjusting those hard-to-reach window coverings, controlling glare or protecting valuable furnishings from the sun are now simplified. At the touch of a button, window coverings can be instantly adjusted to changing activities or the varying sun conditions.

Glare can be annoying while trying to watch your favorite television show, surf the web or read the morning paper. An ideal solution is to manage glare with a RemoteLift™ hand-held remote control. At the simple touch of a button, shades and blinds will open or close to adjust to the changing sunlight in a room.

RemoteLift motorized shades provide ultra-quiet operation. The RF system enables shades to be operated from virtually anywhere in the house without direct line of sight. Similar to how a garage door opener operates, radio signals travel through walls and make it possible to control multiple coverings throughout the home alone or as a group. The RF system is available in both a 1-channel and a 5-channel version to allow for independent control of individual shades and/or group control.

The RemoteLift motorization system provides many benefits, such as improving energy efficiency, providing easily controllable privacy and also enhancing home security.

Many homeowners too often experience the damaging effects of the sun's UV rays on floor coverings, furniture, wall coverings and artwork. Programming shades to raise or lower at certain times of the day helps to manage heat gain in summer months and heat loss during winter - reducing monthly energy bills.

The RemoteLift RF timer allows users to program specific times of the day to automatically adjust shades in different areas of the house, protecting interiors from the fading effects of direct sunlight. This feature provides added security to an unoccupied home by creating a lived in look even while homeowners are away on vacation.

The battery powered RemoteLift RF wireless wall switch allows shades to be controlled when entering or exiting a room, just like the lights. The switch may be seamlessly installed without wiring next to any light switch or stand alone, and is never misplaced. This one touch privacy helps create the ideal environment whether preparing for a bath, relaxing in bed or enjoying time with the family at home.

Our RemoteLift motorized shades are powered by Somfy, the industry leader in automated window coverings. All motorized products are backed by a 5-year warranty.
