

## GOAL OF HIGH VALUE PRODUCTS

LODAAT has developed a range of High Value Products which are small volume niche APIs, and which large API manufacturing firms cannot produce economically for smaller country markets. Examples include; Nepafenac, Bromfenac Sodium etc.

Our Goal for these products:

- To develop APIs where there are no active DMFs operating in US or EU.
- To develop APIs close to approval dates of brands, so that LODAAT would be the lone supplier initially to work at R&D stage with generic companies fairly early so that the relationship is locked.
- LODAAT will be a new product premium supplier and better relationships with generic companies.
- To develop IP strategy for molecules which are yet to be approved and file process patents, polymorph/salt patents encompassing the product which would provide a unique platform for the company to partner with generic companies.

## REGULATED

### Patent Protected Markets and Plant Inspection Markets (Other than US & EU)

- Countries included in this category are: Mexico, GCC, Turkey, South Korea, Brazil, Argentina, China, Israel etc.
- Such markets require cost competitiveness, and smaller volumes-a LODAAT strength.
- For various integrated companies these markets are more attractive on launching generic formulations as these markets also have faster registration process.
- LODAAT, through its various partner firms, has developed successfully and filed various process patents in some of these markets.
- LODAAT has a dedicated plant with focus on these markets complying to the regulatory requirements of these countries, which supports cost effective way for API production with focus.

## SEMI-REGULATED:

### Markets include Egypt, Ethiopia etc.

- **New products-** Products which are first time in these countries (not yet off patent in regulated markets). Generic companies in such markets are continuously looking for new products launched and approved in regulated markets.
- **Develop cost competitive products-** Products which are already existing in markets with few restricted manufacturers; LODAAT with its chemistry capabilities would pick up such products work on cost competitiveness and tie up with generic companies to offer such products.

## REGULATED PRODUCTS

PRODUCTS VALIDATED	PRODUCTS DEVELOPED	PRODUCTS UNDER CONSIDERATION
<b>Antibiotic</b> Lymecycline	<b>Antiarrhythmic</b> Dronedarone Hydrochloride	<b>Antiglaucoma</b> Brimonidine Tartrate
<b>Antihypertensive</b> Telmisartan	<b>Antiasthmatic</b> Montelukast Sodium	<b>Antihistamine</b> Emedastine Difumarate
<b>Anti-inflammatory (NSAID)</b> Bromfenac Sodium Nepafenac	<b>Antiepileptic</b> Lacosamide	<b>Antihyponatremia</b> Tolvaptan
<b>Antipsychotic</b> Tetrabenazine	<b>Antihistamine</b> Olopatadine Hydrochloride	<b>Antiparkinsonian</b> Safinamide
<b>Antispasmodic</b> Trospium Chloride	<b>Antihypertensive</b> Clonidine	<b>Antipsychotic</b> Asenapine Maleate Iloperidone
<b>Potassium Channel Blocker</b> Dalfampridine	<b>Antiplatelet</b> Prasugrel Hydrochloride	<b>Antithrombotic</b> Argatroban
	<b>Antispasmodic</b> Darifenacin Hydrobromide	
	<b>Diuretic</b> Ethacrynic Acid Ethacrynate Sodium	

Note:- Products Protected by Patent in the Country are not offered for sale to that Country.

## SEMI-REGULATED PRODUCTS

PRODUCTS VALIDATED	PRODUCTS DEVELOPED	PRODUCTS UNDER CONSIDERATION
<b>Antidiabetic</b> Glimepiride	<b>Antiacne</b> Adapalene	<b>Antiarrhythmic</b> Dronedarone Hydrochloride
<b>Antiprotozoal</b> Nitazoxanide	<b>Antipsoriasis</b> Tazarotene	<b>Antiulcerative</b> Lafutidine
<b>Potassium Channel Blocker</b> Dalfampridine	<b>Vasodilator</b> Udenafil	<b>Antimigraine</b> Almotriptan Malate Eletriptan Hydrobromide Frovatriptan Succinate Rizatriptan Benzoate
<b>Anti-inflammatory (NSAID)</b> Bromfenac Sodium Dexketoprofen Trometamol Licofelone Morniflumate Nepafenac	<b>Antidepressant</b> Agomelatine Dapoxetine Hydrochloride Duloxetine Hydrochloride Escitalopram Oxalate Reboxetine Mesylate	<b>Antiasthmatic</b> Carmoterol Ibudilast Montelukast Sodium Roflumilast Arformoterol Tartrate
<b>Antiepileptic</b> Lacosamide Pregabalin Topiramate Eslicarbazepine Acetate	<b>Antihistamine</b> Desloratadine Emedastine Difumarate Olopatadine Hydrochloride Rupatadine Fumarate	<b>Antilipemic</b> Atorvastatin Calcium Ezetimibe Pitavastatin Calcium Rosuvastatin Calcium
<b>Antispasmodic</b> Darifenacin Hydrobromide Pargerverine Hydrochloride Solifenacin Succinate Trospium Chloride	<b>Antiglaucoma</b> Brimonidine Tartrate Brinzolamide	<b>Antiosteoporosis</b> Strontium Citrate Strontium Ranelate
<b>Antiparkinsonian</b> Dexpramipexole Pramipexole Dihydrochloride Safinamide	<b>Diuretic</b> Ethacrynic Acid Ethacrynate Sodium Darifenacin Hydrobromide	<b>Antithrombotic</b> Argatroban
<b>Antihyperuricemic</b> Febuxostat	<b>Antihyponatremia</b> Tolvaptan	<b>Antiplatelet</b> Prasugrel Hydrochloride
<b>Antipsychotic</b> Asenapine Maleate Iloperidone Olanzapine Risperidone Tetrabenazine	<b>Antihypertensive</b> Clonidine Clonidine Hydrochloride Losartan Potassium Olmesartan Medoxomil Perindopril Erbumine	<b>Antibiotic</b> Balofloxacin Linezolid Lymecycline Moxifloxacin Hydrochloride
