Subject: Polypropylene Resin Supply

Dear Valued Partner,

As you are no doubt aware from the ongoing news reporting, the destruction caused by hurricane Harvey in Southeast Texas has had significant impact on our industry. As a result, the major resin producers in the region have declared Force Majeure. Most of those manufactures remain offline, which we expect to remain the case for several weeks.

For your reference we have included several notifications we have received from our suppliers of polypropylene, the raw material we use to produce INTEPRO[®]. In addition, we have included a chemical data bulletin that may provide some insight into other resins within your supply chain.

Please be aware that this resin supply disruption may result in increased lead-times and potential price increases. We will be in contact with you as we learn more about the situation.

If you have any questions please feel free to contact me directly at (310)623-2116.

Thank you for your patience and support.

Best Regards,

Andy Boyle
