

ALLA BREVE EDUCATIONAL CONSULTING K12 SOLUTION OFFERING

Alla Breve Educational Consulting HELPS Schools Meet Early Literacy Targets

Alla Breve Educational Consulting is excited to announce a new offering for K12 institutions. As part of its mission to save districts time in the analysis of data so that staff can spend time focusing on student outcomes, Alla Breve Educational Consulting has designed HELPS. HELPS, Heuristic Early Literacy Prediction System, allows teachers and administrators to discover what factors impact literacy outcomes in third grade and predict which students are likely to be at risk for meeting literacy expectations by third grade (and why). Using district data and a predictive modeling tailored to your students, HELPS will focus data conversations and inform instructional approaches to strengthen early literacy skills.

HELPS includes one license of IBM SPSS Modeler Personal, early literacy focused predictive and scoring models, five days of model preparation to meet your district's needs, and two days of training on the use of Modeler and model implementation in your district.

For more information or pricing, please contact AllaBreveUSA@gmail.com.

About Alla Breve Educational Consulting

Alla Breve is the musical term for cut time, and with Alla Breve Educational Consulting LLC, educational institutions can save time (and money) by being more efficient and effective with their data. With 25 years of research experience, Dr. Nicole (Catapano) Alioto, Owner of Alla Breve Educational Consulting, spent the majority of her career working in higher education and K12 to use data for improving student outcomes and institutional effectiveness and that mission continues today.

Alla Breve Educational Consulting LLC is a registered IBM Business Partner and certified reseller of SPSS solutions.
