

Method 1

$$\frac{150^{500}}{149^{501}} = \frac{150^{500}}{149^{500} \times 149^1} = \left(\frac{150}{149}\right)^{500} \times \frac{1}{149}$$

$$= 0.19 \text{ (to 2 decimal places)}$$

Answer (D)
