

Bloodborne Pathogen & Communicable Disease

Training Documentation

VFISU 107 Bloodborne Pathogen & Communicable Disease Annual Refresher is designed to comply with a portion of the requirements of Occupational Safety and Health Act, 1910.1030 for annual review of bloodborne pathogen and communicable diseases for emergency service personnel. Upon completion of the online program, each individual must meet with their infection control officer or designee to review all requirements set forth by OSHA 1910.1030.

Item	Completed
Review any questions you may have on standard or topics within the standard	
Review new information / equipment / procedures for your organization.	
Review your organizations PPE location, use, cleaning, etc	
Review organizational exposure data for the last year (including bloodborne and airborne exposures and methods to reduce exposure)	
Review disease statistics for your state for the past year	
Review disease outbreaks and health alerts in your area	
Review new / revised applicable OSHA standards	
Review current procedures to be taken for a significant bloodborne pathogen exposure	
Review any applicable items identified by organization	
Obtain a copy of your organization's related standard operating guideline(s) and review it, asking questions of your supervisor/trainer as necessary.	

All required items detailed above were reviewed by the undersigned member and designated infection control officer (or designee) following the completion of the VFIS University program.
