

Forecasting: Utilizing Excel, The Internet and ArcGIS

Presented by:

**Matthew Good, IT Analyst – Crime Mapping
San Bernardino Police Department**

Agenda

General Business Meeting: 0900 – 0930 hours

Check – in will begin at 0930

Training: 1000 – 1200 hours

Date: Thursday, February 1, 2018

Location: San Bernardino Police Department, Main Training Room, 2nd Fl
710 N D St, San Bernardino, CA 92401

Forecasting is a critical role in predicting future incidents as part of an ongoing crime series but can be overwhelming for many analysts without the proper training and tools. With access to Microsoft Excel, the internet and ArcGIS, you can calculate forecasts in just a few easy steps!!

This training will cover the following key areas: creating date/time forecasting manually; using Excel to forecast; spatial forecasting without ArcGIS; spatial forecasting with ArcGIS Desktop; and, spatial forecasting with ArcGIS Pro. At the conclusion of the class, students will leave with multiple options to calculate a forecast and be able to apply the one they are most comfortable with back at their department!

(This training is for general members and Law Enforcement Personnel ONLY)
