WEB COMFORT™

WEB-TM Web Comfort Energy Manager

Integrated Energy Management

APPLICATIONS:

Web Comfort is suitable for renovation, upgrade and new construction projects.

- Commercial Offices
- Educational Facilities
- Worship Facilities
- Research Facilities
- Retail Locations
- Hospitality & Restaurants

FEATURES:

- Remote monitoring and control of lighting, HVAC, fans, networked PCs and plug devices
- Metering and demand response
- Optional connectivity to Modbus and BACnet
- Easy to install and configure: simply mount, connect, power and go!
- Secure wireless 2.4GHz ZigBee communications with other network devices
- Data storage retains all system events for over one year; event data can be analyzed to optimize energy use and savings
- Scalable to manage a single building or an entire campus
- Graphical view of real-time and historical energy use provides comprehensive and actionable information to users
- Web Comfort products operate independently or as an integrated solution
- Made in the USA (ARRA Compliant)

DESCRIPTION:

The Web Comfort WEB-TM Energy Manager from Jackson Systems is a rugged, industrial control processor that is the heart of innovative integrated energy management systems powered by Web Comfort software. The Energy Manager coordinates all energy management functions utilizing Web Comfort wireless network.

The compact Web Comfort WEB-TM Energy Manager receives input from environmental sensors, local controls and metering devices throughout a facility. Based upon sensor input, schedule, local input, curtailment, and event information, adjustments to lighting, HVAC, fans, networked PCs and plug devices are implemented in real time to minimize energy waste.

Communication with other Web Comfort Meters, the Web Comfort Energy Manager running metering software and other Web Comfort devices (such as lighting and HVAC controls) is via a reliable wireless mesh network.

WEB-TM Web Comfort Energy Manager

Integrated Energy Management

SPECIFICATIONS:

APPLIANCE

Mounting: Wall bracket or table-top

Storage: SATA 2.5" hard drive

Endpoint Capacity: ~300, upgradable to 1000

Operating System: Secure Linux-based variant

POWER SUPPLY

Voltage: 120VAC input/ 12VDC output

Power: 20 watts max

I/O SUPPORT

LAN: 1x10/ 100/ 1000 Ethernet, TCP/ IP v4

UDP ports: 49657, 54261, 59370, 59371

Serial: 2 - 1 dedicated internal, 1 open

USB: 2 USB 2.0 host interfaces

PROTOCOLS

Serial: Modbus, RS-485, MS/ TP

Wireless: 802.15.4 with mesh networking

Ethernet: HTTP/ HTTPS

Security: Internal firewall, isolated wireless and internal processors

RADIO NETWORK

IEEE 802.15.4-2003 2.4GHz ISM (ZigBee)

Range: Approx. 1000' LOS transmit/ receive

REGULATORY APPROVALS

UL 60950

FCC (V8NZRB1000141) & IC (7737A-ZRB1000141), Certified Class B

Digital Device, FCC Part 15

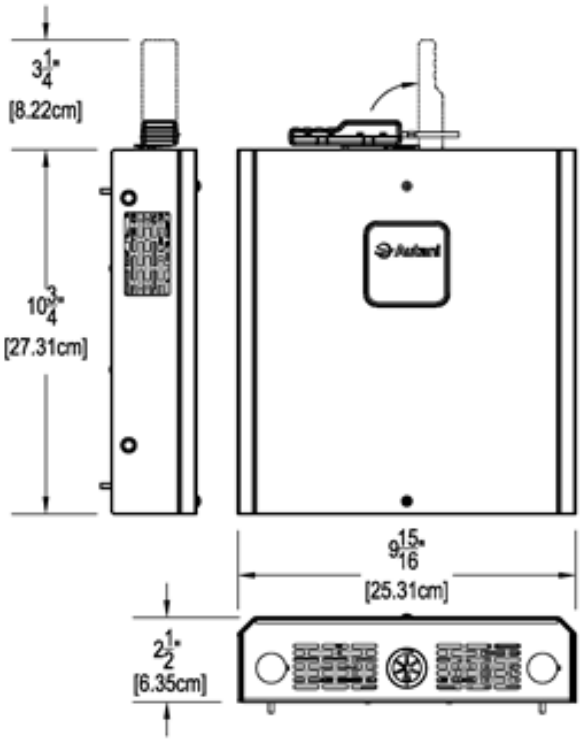
WEB COMFORT™

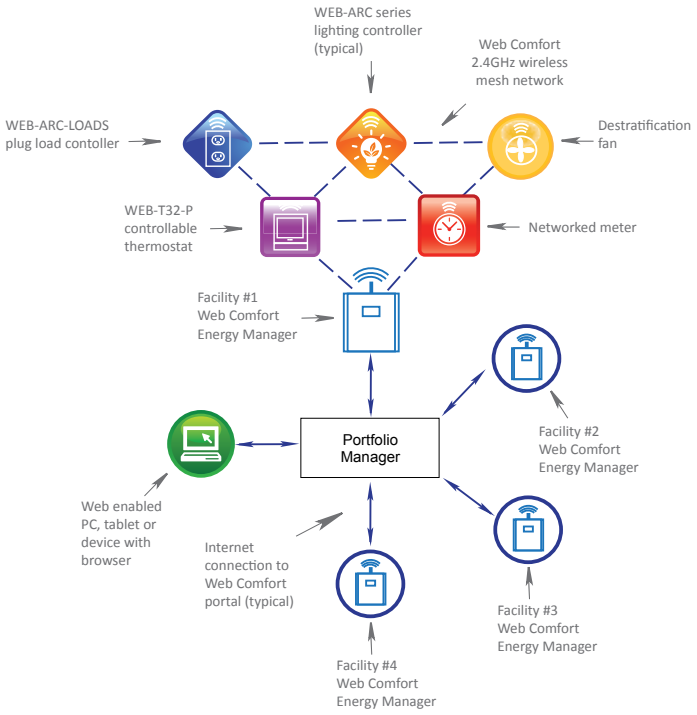
WEB-TM Web Comfort Energy Manager

Integrated Energy Management



MULTI-SITE CONNECTIVITY:

Web Comfort's Portfolio Manager is a hosted software solution for managing the temperature, lighting and energy consumption of multi-site facilities. Using a secure, web-based interface that connects two or more Web Comfort systems, Portfolio Manager directs schedules, alerts and demand response events across multiple premises.



THE WEB COMFORT FAMILY

ENERGY MANAGEMENT DONE RIGHT

The Web Comfort product line from Jackson Systems integrates lighting, climate control, fans, metering, and plug loads to provide a powerful integrated energy management solution. The lighting, thermostat, fan control and metering software share the Web Comfort Energy Manager and operate as an integrated application.

Web Comfort software communicates via the Web Comfort Energy Manager to lighting controllers, motion sensors, thermostats, fans, meters and plugs using a secure wireless 2.4GHz ZigBee communications network.

Wirelessly Communicating Thermostat

APPLICATIONS:

Web Comfort is suitable for renovation, upgrade and new construction projects.

- Commercial Offices
- Educational Facilities
- Worship Facilities
- Research Facilities
- Retail Locations
- Hospitality & Restaurants

FEATURES:

- Integrated Modbus transceiver with factory wiring harness included
- Easy front panel access for transceiver diagnostics
- Universal applications
- Easy to install and configure: simply mount, connect, power and go!
- Secure wireless 2.4GHz ZigBee communications with other network devices
- Scalable to manage a single building or an entire campus
- Graphical view of real-time and historical energy use provides comprehensive and actionable information to users
- Web Comfort products operate independently or as an integrated solution
- Made in the USA (ARRA Compliant)

DESCRIPTION:

The Web Comfort WEB-T32P Thermostat from Jackson Systems is a rugged, industrial control that communications with the Web Comfort Energy Manager. This universal thermostat features an integrated Modbus transceiver that connects to the Web Comfort Energy Manager through a secure Zigbee mesh network. This design allows each thermostat to communicate with other thermostats, extending the range and ensuring a strong and reliable signal.

The integrated transceiver with factory wiring harness reduces installation time and eliminates miss-wiring. Additionally, it provides easy access for transceiver diagnostics without having to remove the thermostat sub base.

WEB COMFORT™

WEB-ARC Switched Controller

Wireless Lighting and Load Controllers

APPLICATIONS:

Web Comfort wireless lighting controllers are suitable for renovation, upgrade, and new construction projects where individual fixture control and/or monitoring is desired.

- Private & Open Offices
- Corridors & Hallways
- Classrooms & Gymnasiums
- Warehouse Spaces & Manufacturing Areas
- Patient Care Rooms
- Transportation Terminals
- Retail & Grocery Stores

FEATURES:

- Multi-Voltage Compatible, 120 to 277VAC
- Dimming and daylight harvesting (which support Title 24 requirements)
- Provides two 0-10V dimming control outputs
- Plenum Rated device promotes an efficient, distributed control strategy
- Supports the Web Comfort range of wired and wireless occupancy sensors, including door and window contacts
- Local control via standard light switches and contact closures; 3-way and 4-way switching configurations are supported
- Connected sensors and switches function locally if Network Communications are lost
- Enhanced zero-crossing circuitry and control
- Configurable for momentary or maintained switch inputs
- UL Listed & Plenum Rated
- Designed & Made in the USA

DESCRIPTION:

The Web Comfort WEB-ARC Switched Lighting and Load Controllers are wirelessly managed 120/277VAC plenum-rated controllers. The WEB-ARC provides managed control of up to two independent switched circuits, supporting the second circuit via an external power pack.

Compatible with the Web Comfort WEB-ARC range of wired and wireless occupancy sensors, the WEB-ARC also provides connectivity for door and window contacts. The room controller can be operated in stand-alone mode (as a standard switched power pack) or as part of a Web Comfort Integrated Lighting Management System using the Web Comfort wireless mesh network.

As a network device, the WEB-ARC is controlled by a Web Comfort Manager running the lighting software. The software manages lighting circuits based upon time schedules, local control, occupancy, demand response curtailments, light level, computer activity and door openings or closures.

WEB-FAN Airius Pear Fan

Wirelessly Managed Thermal Destratification

APPLICATIONS:

Airius Air Pear Fans are a managed system of thermal destratification fans that reduce energy consumption by increasing the efficiency of heating and cooling systems.

- Warehouse & Industrial Facilities
- Grocery & Retail Stores
- Gymnasiums & Auditoriums
- Hospitality

FEATURES:

- Destratification and Thermal Equalization can reduce energy consumption up to 30% or more
- Suitable for mounting height from 25’ – 100’ and up to 2500 ft2 of coverage per unit (see model numbers for specific coverage)
- A properly applied array of units is capable of achieving temperature balance within 0° to 3°F
- Control and monitoring of speed, direction, and run time via Web Comfort software
- Web Comfort secure wireless 2.4GHz ZigBee communications with network devices
- Real-time alerting for user defined and system events via email or smart phone
- Easy installation for connection to building structure; drop ceiling mounting kit available
- Meets LEED EA Credit, “Optimize Energy Performance”
- Manufactured from recyclable materials and shipped in recyclable corrugated packaging
- Made in the USA (ARRA Compliant)

DESCRIPTION:

The WEB-FAN Airius Air Pear fan is a wirelessly managed destratification fan. These fans form the foundation of Web Comfort Thermal Equalizer System that reduces energy consumption by increasing the efficiency of heating and cooling systems.

Stratification, or temperature layering, occurs when there is minimal air movement within an enclosed building space. Heat (naturally or artificially generated) rises to the ceiling while cold air sinks to the floor. Temperatures can increase up to 1°F per foot of building elevation.

In cold weather, destratification redirects hot air from the ceiling to the floor, recycling existing heat and reducing energy consumption. In moderate or warm weather, destratification reduces temperature differentials within the space and increases the efficiency of HVAC systems.

As a network device, the WEB-FAN Airius Air Pear is controlled by Web Comfort software. This software manages the speed, direction and run-time of destratification fans based upon schedules and demand response requests.

WEB-SMARTLET

Wireless Outlet Controller

APPLICATIONS:

The Web Comfort SmartLet Outlet Controller provides automatic receptacle control as required by ASHRAE 90.1 2010 Section 8.4.2.

- Private Offices
- Open Offices
- Computer Classrooms
- Hospitality & Retail

FEATURES:

- Easy-to-install automatic receptacle control for 15A/120VAC outlets suitable for new construction and upgrade projects
- Integrated, mechanically switched relay controls one or both receptacles by any combination of schedule, occupancy/ vacancy, demand response, and activity of plug loads
- Occupancy sensors and scheduling are shared with ARC and AFC series lighting controllers
- Local over-ride to manually switch receptacles ON or OFF with LED status indicators
- On-board energy monitoring to measure and track power consumption of plug loads in real time
- Fail safe operation maintains local control of receptacles at all times
- Web Comfort secure wireless 2.4GHz ZigBee communications with other network devices
- FCC and IC certified; UL Pending
- Made in the USA(ARRA Compliant)

DESCRIPTION:

The Web Comfort Smartlet integrates automatic receptacle control with dimming and switching systems. The Outlet Controller switches 120VAC receptacles ON or OFF based upon occupancy, schedules, and demand response events. The Web Comfort Smartlet is attached to 15A/120VAC duplex receptacles, which power the device.

The Web Comfort SmartLet Outlet Controller is wirelessly configured, scheduled, and controlled by a Web Comfort Energy Manager. Dynamic scheduling allows the user to define ON and OFF events for receptacles, as well as periods governed by occupancy rules. Timeouts to switch off loads in unoccupied spaces are easily set per schedule or event, and can vary throughout the day.

Connectivity between the SmartLet, Web Comfort Energy Manager, and other devices is via the secure, reliable Web Comfort wireless mesh network.

Wireless Duct Temperature Sensor

APPLICATIONS:

Wireless Duct Temperature Sensors are suitable for renovation, upgrade, and new construction projects where individual fixture control and/or monitoring is desired.

- Private & Open Offices
- Corridors & Hallways
- Classrooms & Gymnasiums
- Warehouse Spaces & Manufacturing Areas
- Patient Care Rooms
- Transportation Terminals
- Retail & Grocery Stores

FEATURES:

- Compact temperature probe with wireless connectivity
- High accuracy and interchangeability over a wide temperature range
- No control wiring required! Web Comfort's secure wireless 2.4GHz communications with Web Comfort Manager and other network devices
- High resistance relative to Platinum RTDs creates a larger signal with the same measuring current, negating most lead wire resistance problems and eliminating the need for signal conditioners.
- Double-encapsulated sensing element to avoid sensor failures caused by moisture infiltration
- Designed & Made in the USA

DESCRIPTION:

The Web Comfort Wireless Duct Temperature Sensor is a 24V, in-duct temperature probe featuring an integrated wireless transceiver—eliminating the need for control wiring. The sensor monitors supply and return air temperatures. It can also be used to sense temperature from ambient air.

A thermistor type sensor, the Wireless Duct Temperature Sensor provides a predictable output over a specified temperature range to meet each manufacturer's required input values.

The Wireless Duct Temperature Sensor uses the Web Comfort's wireless mesh network to communicate with other Web Comfort devices to trigger changes in HVAC.
