

## **Roofing Repair / Replacement**

June 06,2019

To whom it may concern.

All construction within the City of Lake Quivira requires 2018 IBC/IRC compliance. Regarding roofing, this does include “Ice and Water Shield”.

The City of Lake Quivira does not require permitting on replacement roofing.

If a home sustained structural roof damage, a permit will be required. Changes to rooflines or adding a dormer etc., while the home is under repair will require permitting as well.

Please contact the Homeowner’s Association – Quivira Incorporated regarding HOA requirements. 913 631-7707
