1. The blue represents the Susquehanna River, while the yellow represents electricity in reference to Thomas Edison. Blue and gold are also the state colors of Pennsylvania. The three yellow stripes represent Thomas Edison's three wire system, which was first successfully installed in Sunbury. The Y-shape, called a pall in vexillology, represents the convergence of the north and west branches of the Susquehanna River in Sunbury.
2. The blue represents the Susquehanna River, while the yellow represents electricity in reference to Thomas Edison. Blue and gold are also the state colors of Pennsylvania. The three yellow stripes represent Thomas Edison's three wire system, which was first successfully installed in Sunbury. The Y-shape, called a pall in vexillology, represents the convergence of the north and west branches of the Susquehanna River in Sunbury. The yellow circle represents the sun, in reference to the town's name.
3. The blue represents the Susquehanna River, while the yellow represents electricity in reference to Thomas Edison. Blue and gold are also the state colors of Pennsylvania. The three yellow stripes represent Thomas Edison's three wire system, which was first successfully installed in Sunbury. The Y-shape, called a pall in vexillology, represents the convergence of the north and west branches of the Susquehanna River in Sunbury. The yellow circle represents the sun, in reference to the town's name. The keystone is in reference to Pennsylvania's nickname, "The Keystone State."
