**LAWN CARE PROGRAM**

**KNOWING WHEN TO APPLY FERTILIZER, HERBICIDE AND INSECTICIDE IS JUST AS IMPORTANT AS KNOWING WHAT TO USE. WE HOPE THE HANDY “HONEY-DO” LIST WILL HELP YOU KEEP YOUR LAWN LOOKING GOOD ALL YEAR**

## JANUARY

Begin the New year with a proactive approach to lawn care.

- Apply **Hi Yield pre-emergent dimension** to prevent weed seeds from germinating

\* **Buzz Worthy:** “The best bee-fense is a good offense.”\*

## FEBRUARY/

Kick Start your turf’s spring growth.

- Apply **Fertilome Weed and Feed**

## MARCH

- May apply **Atrazine** as a back up for tough weed problems

- Fertilome Weed Free Zone** post emergence may be applied to help control existing weeds

- Take advantage of our natural guard **Activator** which serves as a dethatcher for a healthier, more vigorous fungus resistant lawn\*

## MARCH/

- While temperatures allow, **Fertilome Weed and Feed** and **Atrazine** may still be applied

## APRIL

- Apply post emergent herbicide: **Weed Free Zone** or **Weed Out**

- Use **Fertilome FStop** or **Fertilome Systemic Fungicide** to prevent early stages of lawn fungus

\***Buzz Worthy:** Bee careful not to encourage Fungus! It’s better to water less frequent and more deeply between the hours of 5-10 a.m.

**\*Remember-Hi Yield Dimension every 3 months\***

## MAY/

- Apply **Fertilome Weed Out** or **Fertilome Weed Free Zone** post emergent herbicide to entire lawn or spot treat as needed before summer temps creep up!

## JUNE

- Feeding Time! **Fertilome’s Classic** or **Centipede Food** is best for the second feeding of the year

- Apply an insecticide, such as **Hi Yield Bug Blaster** or **Turf Ranger** for those destructive summer pest

## JULY/

**Weed Control is more restrictive in summer, be sure to read labels before applying herbicides!**

- Apply **Image** post emergent or **Hi Yield Nutsedge Control** (controls grassy and broadleaf weeds along with sedges)

- Fertilome Weed Out** may be used with caution-**Spot Treat Only!**

- A follow-up fungicide or insecticide may be necessary-**Ask our Experts.**

- Late summer-a great time to add iron to a dull lawn. Apply **Fertilome Lawn Food Plus Iron** in mid July

## AUGUST

**Still Troubled? When in Doubt, let us check it out!**

- We encourage you to bring in samples of your leaves, branches, insects or a plug of declining grass with soil. Pictures are helpful too, but the real deal is always best.

\***Buzz Worthy:** Beauty is in the eye of the BEE-holder! Caterpillars on your citrus may morph into beautiful swallow tail butterflies.

**\*Remember-Hi Yield Dimension every 3 months\***

## OCTOBER/

- Apply **Fertilome Winterizer** for the last feeding of the season to ensure your turf and plants rest well and the roots are nourished for upcoming dormancy.

## NOVEMBER

- Use **Fertilome Weed Free Zone** or **Fertilome Weed Out** to control existing weeds.

\***Bee Worthy:** Bee sure to stop in for local honey for the cold season!

## DECEMBER

This month take a break from the yard and **visit one of our Floral Tree Garden locations for your Holiday Shopping!** You’ll find the most BEE-autiful poinsettias and holiday cactus along with a great selection of evergreen trees. Colorful planters, yard art and loaded citrus trees along with gift certificates make great gifts. Maybe treat your someone to a new landscape for the upcoming year. We do full installations and with the help of a professional landscape designer like Lesa Stack, the job can be a breeze!

\*Inquire within for on site help sprucing up your planters for holiday parties!\*
