

Professional Development Opportunities for K-12 Teachers in New York State

The New York State Master Teacher Program invites pre- and in-service K-12 teachers to participate in FREE professional development activities. These opportunities are designed and hosted by New York State Master Teachers and faculty from the State University of New York (SUNY), and will be held this spring in various regions throughout the state.

What Will I Learn?

Workshop topics include pedagogical strategies, such as technology tools for the math classroom, culturally responsive teaching, and the NYS P-12 Science Learning Standards. Professional development topics also focus on STEM content, such as probability and statistics in Algebra 2, and physics activities for the elementary school classroom. Click on the link below for the complete list of topics.

Have an Idea to Share?

Conferences in Mohawk Valley, the Capital Region, and the Southern Tier welcome you to share. Details are available in the conference descriptions.

Locations and Time

Locations for the professional development activities vary and include SUNY campuses, Teacher Centers, and schools. Participants do not need to teach or live in the district where the activity is located but are responsible for their own travel expenses.

The professional development activities are afternoon or evening workshops, Saturday half-day or full-day conferences. Many of the professional development activities encourage participants to bring their lessons and ideas to share. Full descriptions, location details and instructions for how to register are available at the link below. *There is no fee to participate.*

Review the complete list of offerings and choose the activities that would help you provide the most innovative and engaging learning experience for your students!
