Big News!!

We are now a **CERTIFIED DENTAL LAB**

**CERTIFIED
DENTAL
LABORATORY**

We are so excited to announce that we have earned Certified Dental Laboratory designation from the

National Board for Certification in Dental Laboratory Technology! This elite distinction makes Morse Dental Lab one of only 9 Certified Dental Laboratories in the state of Ohio. There are currently 191 certified dental labs out of an estimated 7,500 dental labs in the United States.

Becoming a Certified Dental Laboratory assures our dentists that our lab has met specific standards relating to quality assurance, safety, and business and manufacturing practices. By earning and maintaining the CDL designation, we are always monitoring and improving the quality and efficiency of their services and facilities. The CDL is recognized by the National Association of Dental Laboratories (NADL), the American Dental Association (ADA) and the American College of Prosthodontists (ACP).

WHY SHOULD I CARE IF MY LAB IS A CERTIFIED DENTAL LAB?

As a dentist, it is crucial that you are providing quality products and services to your patients. By using a CDL, you are assured - and can reassure your patients - that the laboratory making their appliances maintain:

Diligent Hygiene

All CDLs must have regular infection control training and good infection control procedures.

Quality

Choosing a certified lab ensures supervision by highly qualified, certified dental technicians.

Integrity

Certified Dental Labs uphold the highest quality and safety standards in the industry.

Case Management

All certified labs must maintain records of their brand specific products and services used for fabrication.

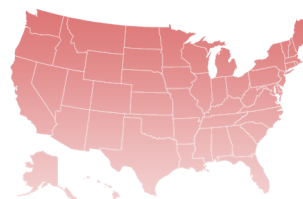

Accountability

Certified Labs must have facilities and products that meet or exceed government regulations.

Communication

Morse Dental Lab uses an alloy labeling system so you can know what's in your mouth.
