

NEW SUPPLY CHAIN FOCUS WORKSHOP

Do you understand how all the pieces fit together?

Presenting

Lean Inventory and Production Management Focus Workshop

Lean has emerged as a philosophy preaching the total elimination of waste and the optimization of productive resources, a toolbox of techniques for process improvement, and a system through which companies and their business partners can deliver continuous improvement and customer satisfaction.

This one-day workshop will focus on Lean Production Management and Lean Inventory.

Are you ready to succeed?

Sat April 29, 2017 9 AM to 5 PM

**Waterfront Hotel

APICS Supply Chain Focus Workshops

Lean Inventory and Production Management

Lean Inventory – Theory and Practice

Lean Inventory – Theory and Practice is concerned with the investigation of inventory from a different perspective: the application of lean principles and practices. Topics discussed include:

- Concepts of just-in-time (JIT) and lean and how they apply to the management of inventories
- Three major sources of operations waste
- Eight types of process waste
- Differentiating value-added work from waste
- Managing inventory effectively in a lean environment
- Working with Kanban

Lean Production Management

Lean uses visual demand pull signals, such as KanBan cards, instead of orders. Only when the demand signal is activated, will operators build and move items and products as designated by the KanBan. Topics discussed include:

- Lean and just-in-time (JIT) concepts and practices
- Lean thinking
- Employee involvement and empowerment
- Lean production concepts and practices
- Lean plant layout design
- Kanban production techniques
