## Microdermabrasion

\$95 (1 hour 15 minutes)

Microdermabrasion is a non-chemical, non-invasive method of skin resurfacing. This Procedure is a gentle yet effective mechanical exfoliation of the skin. The result is similar to a light chemical peel. The procedure causes little to no discomfort and has dramatic positive lasting effects. Micro- Dermabrasion minimizes fine lines, sun damage, acne scarring, skin pigmentations, and enlarged pores.

Over time, this repeated process stimulates the production of a new layer of skin cells, bringing with it an increased level of collagen and elastin, improving the skin's appearance.

\*Includes all the benefits of the traditional European deep cleansing facial, plus the use of the Micro- Dermabrasion system.

\*A recommended four to six treatments are required for best results. (Save 10%)
