CORRESPONDENT ' S DESK

Raise Up!

Man has fundamentally transformed landscapes in to simplified human environment. Beaver dams, mound – building termites never disturbed nature though they choose better environment for themselves. Bio char to runaway with green house emission fertilizing the ocean with the iron dust to trigger plankton bloom. Benign Biofuels , relocating species, Reinstating the drinking fountain, Zero-waste fashion and so on when are we going to move to the safe code GREEN from danger code RED?

Its all in the hands of future kids. need to conserve nature. Let's care about the planet with the growing awareness of the being fine and intact for the future.

Our planet is at the verge of extinction sea levels increase, rapid ozone layer thickening rising sea levels disrupted weather, hurricane, turnocloes engulfing living **WAKE UP RAISE UP**. If it is not now its never forever. Any step and every step towards gGreen world would contribute better. My plea to the student Folk is **THINK BIG**. Be responsible, frame steps to move forward. "If you refuse to give up you can move mountains." With persistence and skill impossible would become possible.

PRINCIPAL'S DESK

In Prayer, You talk to existence;
In Meditation, You listen to existence;
In Nature, You see the existence;
In Prayer, I listen to my own voice;
In Meditation, I listen to the beyond;
In Nature, I listen to the rustling of leaves.
I listen to the humming stead chirping
I listen to the buzzing of trees and frightened to catch fly up close cricket...
I try to imitate them...
Since, I had come from them....
I understand without them I can't be
I sincerely apologize for being negligent towards them...
I not only dream, green
I live my green dreams, given dream I dream to Go Green
I'm thankful to the President Shri.C.Balaji
Secretary & Correspondent, Shri R. Balaji, Correspondent Shri A. Senthil Ramesh and the managing committee

Dear Readers,

On behalf of E-News Editorial Board of Light House, We are happy to release the Third Issue and we take this opportunity to convey our gratitude to the Management, Principal and all the teachers for their effort and contribution towards the E-News-Light House. We hope our readers to implement the green measures and hence increase the overall quality of our journal. We wish you all a successful 2019 ahead.

G....R....E....E....N

Rosy is a little girl who loved the nature very much. She live in a village with her parents. They had a small area of land nearer to their house. Rosy had ideas to create a garden in that place. So she ploughed the land, watered the land and made it ready to plant many plants and trees.

After few days she planted few coconut trees, banana trees, flower plants and some vegetable plants in her garden. She was giving too much of care for her garden. It grew.....it grew..... Wow! It made the place very beautiful, many of the birds visited her new garden and made it too wonderful by building their nest in many trees.

A deep dark night ... a big.... black... strong bison came to her garden and ate few leaves and stamped many plants and spoiled every thing and went away. The poor girl Rosy saw her garden in the next day morning and wept.

If we create a garden and it was spoiled by others, how do we feel?

Earth is also like a garden created by the God for us. But today many of the persons like bison spoil the beauty of the earth every day by cutting of plants and make it like bald head, making air dirty by their factories, spoil the land by chemical water

from industries and many selfish fellows enjoy well but not save the nature for the future.

We have rights to use everything in a proper manner but not to destroy it.

"Green.....green..... Ever green!

Dark green Light green...

Every day we can see green in everywhere!"

Green is one of the likening colour of most of the human.

G – Grace (Earth is filled with the **grace** of God)

R – Remember (we should **re-member** about the importance of greenery)

E – Everyday (We can nurture a plant **everyday**)

E – Enjoy (**Enjoy** the beauty of the green carpet over the earth)

N – Number (We should count the **number** of trees we planted in our life)

Make decision to “Plant a tree a day to keep the danger away”.

GREEN INITIATIVES WITH HIGH SCORES IN THE ECO-FRIENDLY SCALE...

Sports stars from different parts of the world have set up a benchmark in promoting eco-friendly measures. They prove themselves to be an inspiration for all the young future champions. This article presents the initiative, promoter and the place

with an aspiration to trigger the reader-champions to add more to the list given below:

Initiative	Promoters
9 Green cleaning products for staff.	The Philadelphia Eagles.
9 Financing tree plantings and seedlings for a wildlife refuge.	
9 Installation of solar panels in their stadium to obtain 37 percent of their energy.	Boston Red Sox.
9 Wind Turbine in stadium.	Cleveland Indians
9 Reduction of water footprint.	Miami Marlins
9 Recycling of plastic bottles - if they were laid end to end, they would stretch from PNC Park to Yankee Stadium and back again. (618 km one way)	Pittsburgh Pirates
9 Reduction of the use of natural gas by 40 percent, electricity by 25 percent and water use by 25 percent. Savings amount to more than \$1.75 million in electricity, natural gas, water and sewer charges.	Seattle Mariners' Safeco field

पेड लगाओ

वन का सांस है पेड़ |
जंगल का वस्त्र है पेड़ |
कुदरत का अमानत है पेड़ |
तुम इनको मत काँटों |
आओ बचाएँ पेड़ |

धरती की जान है पेड़ |
ऑक्सीजन का भंडार है पेड़ |
चिड़िया का घोंसला है पेड़ |
आओ लगाएँ पेड़, आओ लगाएँ पेड़ |

धरती को हरा-भरा बनाए
देश की शान बढ़ाए |

GREEN HUES OF NATURE

‘A walk in the woods or a city park is refreshing because it is what humans are evolved to do’ is the core belief of eco-psychology.

Human beings have an innate instinct to connect emotionally with nature. This is the key concept behind various disciplines like psycho-ecology, green psychology, transpersonal ecology etc. These disciplines bring-out several therapeutic strategies. One among them is the horticultural therapy that is designed for the enhancement of psychological and mental well-being of children and adults.

Horticultural therapy has been a tool practiced for many years. It helps in creating a new sensory space. Sensory space needn't be a physical space. It enhances the habit of balancing moods, self-efficacy, lowered anxiety etc. Inner peace, joy and hope is generated by spending quality time with the plants in the garden. As days are becoming more and more complicated and advanced, it is a wise gesture to spend quality time with the natural gift to us from God – the green hues of nature.

J.JUANITA
STUDENT COUNSELLOR

Environment is the god's creation where we are born, grow, play and live. But we are changing the god's grace. It is the duty of everybody in the earth to save our environment. "**Go green**" is a slogan to encourage people to choose environmentally friendly behaviors and live sustainably with less waste and damage to the environment.

The most important reason to Go Green is "to reduce air pollution and green house gases", "to stop global warming and its effects" and "to make the planet livable for future generations".

Going green helps the environment by reducing the amount of pollution that enters the soil, water and air. By using alternative energy sources and avoiding the burning of fossil fuels, recycling and reducing waste fewer pollutants are released into the environment. Simple things we can do to protect the earth as follows: Reduce the paper usage Reuse and Recycling efforts with glass, plastic and aluminium. Volunteer for cleanups in our community.

- ♦ Conserve water and Plant a tree.
- ♦ Use long –lasting light bulbs and save electricity.
- ♦ Educate the children for their clean and green future.
- ♦ We will take oath to **Go Green** and keep our **Environment clean**.

*As I drove by the lanes of
Big B-smart cities.
My eyes crave for the old fresh
Big banyan and neem canopies.*

*I wonder at the fading world
Because of its want for Go Green.
I think it is the overuse of
The power of choice,
The power of construction,
The power of creations.
The verge of the by-pass is
No more a shelter for passers-by
No more a comfort for twitting birds
No more a sense of visual aesthetics.
The green is gone forever.*
