Also offering design and engineering solutions. This growing company is currently seeking a Quality Assurance Manager that is highly experienced in sheet metal and structural metal fabrication capable of working independently with impeccable attention to detail!

Job Duties

- Perform quality inspection on fabricated parts by interpreting, measuring and verifying mechanical dimensions and tolerances of parts according to drawings and procedures using standard measuring tools and equipment
- Perform inspection on work orders by interpreting drawings and verifying job sequences
- Perform first off, in-process and final inspections of simple and complex parts
- Notify Project Managers and/or SHOP Manager of detected non-conformances
- Generate reports to detail the discrepancies that warrant repair or remake
- Generate inspection/test reports as required and maintain receiving inspection record files
- Perform duties in compliance with Quality Procedures in metal fabrication
- Perform gauge calibration and issuance of gauging
- Responsible for part rejections that do not meet the requirements for acceptance as per company drawings

Requirements / Candidate Profile

- **Minimum of 2 years of previous in-process inspection or manufacturing quality control experience using measurement equipment, jigs, and drawing information**
- **5-7 years experience in sheet metal fabrication**
- Perform multiple tasks and work under minimal supervision
- Strong blueprint reading skills including projections and welding symbols.
- Knowledge of geometric tolerance
- Knowledge of sheet metal material and thicknesses
- Ability to work in a fast-paced environment and impeccable attention to detail
- Must have interpersonal and communication skills across the organizational levels
