

Global Institute for Enlightened Leadership

**Leaders have always been the ones able to network the
POWER STRUCTURE,
manipulating their way to the top,
often creating power obsessed, greedy leaders
– locally, nationally and globally.**

With low quality leadership in
America, Russia, China, Saudi Arabia, Iran, North Korea and many other countries,
and the urgency of problems of violence, proliferation of weapons sales for profit,
population expansion, environmental deterioration,
and religious, racial, tribal and ethnic hostilities,
there has been an intelligence and goodwill gap,
making global conflicts unresolvable.

**To avoid massive violence,
destruction of the Earth's biosphere,
and human extinction in the next 200-300 years,
we need to form the
Global Institute for Enlightened Leadership.**

Contact me if you would like to help create the institute.
