

Date: _____

Dear Prime Minister and Cabinet Ministers;

I am writing to you today to express my support for the oil and gas industry in Western Canada, and the rest of Canada as a whole. As a resident of _____, I know that this industry creates hundreds of thousands of jobs Canada wide, and is only sustainable if we can get our product to tidewater and to overseas markets.

We all know that this business begins here in Western Canada, and the efforts of the people in this industry are the pebble in the pond causing ripples of opportunity across our great country. This allows families from coast to coast to coast to benefit and live fruitful and financially secure lives. Without a firm stand by our federal government on pipeline approvals going both east (i.e. Energy East) and west (i.e. Northern Gateway, Pacific Northwest LNG Project, Trans Mountain Expansion Project), acknowledging that sustainable and responsible production and shipping of our natural resources to overseas markets is paramount to Canada's economic success, we risk falling out of the resource market entirely.

As a proud Canadian oil & gas advocate, I say YES to pipelines and long term responsible energy management. Without them, everybody loses, including the government due to eroding the tax base you so dearly need. I urge this government to be responsible and do what's right for Canadians by putting us first and recognizing that our resources belong to the people of Canada.

Sincerely,
