TOPIC:

Case Study: Viscous Elastic Coatings for Protecting Bell & Spigot Water Lines from Crude Oil Exposure

ABSTRACT:

The presentation will cover the commonly used current system for protecting rural water piping from crude oil leaks; the effect of crude oil on PVC pipe joints and the testing that determined a new solution was needed. After covering what has been done in the past and the issues with this system, we will introduce the testing/research that lead to the approval and implementation of a new solution for protecting rural PVC potable water piping from potential crude oil exposure/contamination.

BIOGRAPHY:

John is a graduate of University of Tennessee with a Bachelor of Science degree. After college, he spent 10 years building a business in Tennessee before selling it, relocating to California and joining the corrosion industry. In the Spring of 2009, he teamed up with Amcorr Products & Services, Inc. to launch the VISCOTAQ Product line. Over the last nine plus years, John has tirelessly traveled the country introducing the VISCOTAQ product. During this time, he has made numerous presentations about Viscous Elastic Coatings & Sealants at conferences throughout the US, Canada, Europe and Asia. Currently he resides in San Antonio and is in charge of business development and sales for Amcorr Products & Services for the United States & Canada.
