Workplace / Physical Requirements**Company**

Join a web technology company based in the (GTA) driven by innovation and specializing in building web technologies. Primarily working with associations, helping them implement complex technology solutions that streamline work processes and make their work more efficient. As a software company, they have two flagship products and a series of modules that can extend the capabilities of their base products.

Job Duties

Are you a self-motivated programmer driven by a strong desire to continuously learn about new technologies and programming methods?

Looking for a hard-core programmer who loves challenges, using new technologies when appropriate and building systems designed to scale.

- Working with the programming team on a micro-service based eco-system.
- Work hands-on with the lead developer to build out modules and implement projects.
- Be a strong problem solver and be comfortable visualizing out-of-the box solutions.
- Comfortable understanding and building on the core components that make-up a modern, cloud-based system, including: configuration-based programming, state systems, APIs and SaaS

Requirements / Candidate Profile

- **Computer Science degree (B.Eng. / BSc.) or equivalent, Masters degree or higher preferred**
- **7+ years' experience JavaScript, MySQL, PHP software development**
- **Strong experience with Linux / terminal**
- **Strong framework experience (JavaScript / Bootstrap / PHP)**
- Experience developing technical design documentation and participating in a technical design and code peer review process
- Working experience with Symfony or similar MVC frameworks
- Experience working with APIs
- Experience with test-driven development (TDD)
- Proactive, energetic, professional, self-starter
- Knowledge of software architecture
- Strong understanding of design patterns beyond MVC
- Understanding of docker, composer, uml, version-control and micro-service management tools
- Strong, practical experience in PHP, JavaScript, TypeScript, Twig, HTML and CSS
- Proven ability to go from concept to the successful implementation of complex software modules
- Nice to have include Node.js, experience with unit testing and familiarity with PHP Storm / IntelliJ as an IDE
- Strong communication and negotiation skills when working with stakeholders
- Detail-oriented capabilities with excellent analytical and creative problem-solving skills, including the ability to deal with situations where information is difficult to obtain, complex or ambiguous
- Comfortable using the terminal

How to apply

To apply please submit resume AND cover letter to HRQR@rnaces.ca for pre-screening and consideration. Your resume should clearly demonstrate you are a good fit for this position.
