Undeniably Accurate Aircraft Appraisals

What is an IA Jet NAAA USPAP endorsed Aircraft Appraisal?

Our appraisal service is unique. We start with our in-house Sr. Certified NAAA Appraiser who is fully endorsed by the Uniform Standards of Professional Appraisal Practice (USPAP).

The inspector:

- Physically inspects the aircraft
- Constructs a complete digital catalogue of the aircraft's interior, exterior, and the Aircraft Maintenance Log Books
- Verifies the presence and completeness of Aircraft Documents, and Log Books
- Verifies the status of maintenance, engine, and aircraft programs
- Research Airworthiness Directive and Service Bulletin compliance history
- Fly the airplane to make sure all systems are functioning properly (optional)
- Test the avionics (optional)
- Conduct an FAA title search to ensure a clear title (optional)
- Review the International Registry status of the aircraft, engines, and components (optional)

We will provide you with a prompt, accurate aircraft appraisal.

The Aircraft Appraisal Report includes a detailed equipment list and NAAA appraised value. Aircraft Blue Book and Vref evaluations are also included as comparisons as well as a Live Time On Market Analysis Report. Our NAAA Certified Appraisal along with evaluations and market analysis provide you with undeniable accuracy. Make your next aircraft decision with confidence and let us help.

We conduct appraisals anywhere in the world
