

## **PRODUCT DATA SHEET**

### **AquaPhalt –SUSTAINABLE COLD MIX**

#### **DESCRIPTION**

Aquaphalt™ is a revolutionary, high performance, flexible, reactive cold mix asphalt repair product for use in repairing asphalt and concrete road surfaces. Aquaphalt™ reacts with plain water to provide a permanent repair solution. All sizes of Aquaphalt™ are free of solvents or volatile organic compounds (VOC's). Aquaphalt™ comes in four (4) sizes (4.0mm, 6.0mm, 9.0mm or 12.0mm) for surface, intermediate or base repairs for any type of asphalt or concrete road repair.

#### **FEATURES**

- **ENVIRONMENTALLY SUSTAINABLE**
- **COST EFFECTIVE**
- **PERMANENT SOLUTION**
- **NCDOT APPROVED**

#### **USE AND DIRECTIONS**

Remove all loose material from area to be repaired. Place Aquaphalt™ in the patch and level with a rake or trowel. Allow 0.5"-1.0" additional height for compaction. Saturate with water and compact. If the depth of the pothole is greater than 2-3", it is advisable to fill the hole in two layers
