Hair Dryer Temperature Test System is a professional instrument for measuring the temperature of a Hair Dryer in working status. It fully complies with the UL859 International standard. The system can install software on your computer and connect with RS-232/USB ports to measure data through an intuitive interface panel. It is a Windows-based application designed for easy use. The software is included when you order the system. Use this software to set up your test, acquire and archive measurement data, and perform real-time display and analysis of incoming measurements. It can perform 24-hour automatic testing until you decide to finish the test. It has been used in many large and famous laboratories in the USA, Italy, Holland, Germany, Australia, Singapore, England, etc.

**Model: TG-53 (PC Series)**

**Specifications:**

1. Test Channels: 60 Channels
2. Thermocouple: J or K
3. Test Cycle: TR-60CH: 5.0 Sec.
4. Accuracy: 0.1% +/- 0.5 °C / °F
5. Data Resolution: 0.1 °C / °F
6. PC Connector: RS-232 / USB (1.1 version)
7. Power: AC 120V 60Hz 2A
8. Test Time: Unlimited
10. PC Display Print Out:
   - Temperature Graphic, Chart, Test Result Data Figure

It has been used by UL, Intertek, TUV, KEMA, Conair laboratory and over hundreds of enterprises.
