

2019 REVIT® TRAINING

Useful modeling skills for real-world projects

We teach you **only** what you need to know; not every button and feature in the program. The demand for Revit modeling (all disciplines) has increased dramatically as the 3D coordination effort is used on a regular basis. These classes are designed for every user, at every stage, as well as by discipline. You can take all the classes or choose only the ones that relate to your trade and skill level. Come learn to model and save the world.

Classes are from 8:00 am - 12:00 pm
