FEEDING DIRECTIONS

Feed this product continuously at the rate of 1.0 lb per head per day by thoroughly mixing with a grain-roughage mixture to provide 250 mg lasalocid per day. To achieve appropriate drug levels, blend 120 lb of this product with 1880 lb of grain and/or roughage to produce a ration with 30 gm per ton lasalocid, then feed 16.7 lb of this blended ration. Provide clean, fresh water at all times.

WARNING: A withdrawal period has not been established for this product in pre-ruminating cattle. Do not use in calves to be processed for veal. This feed should be used only in accordance with instructions furnished on the label.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Do not allow horses or other equines access to formulations containing lasalocid as ingestion may be fatal. The safety of lasalocid in unapproved species has not been established. Feeding undiluted or mixing errors resulting in excessive concentrations of lasalocid could be fatal to cattle. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed 1/3 of the crude protein of the total ration. Use only as directed. 26316
