

Prepare for Spring with a “Backyard Bag” or “Garden Tote”

PACD is excited to offer these incredibly useful, reusable bags! These little beauties are light weight, strong, fold flat for storage and stand up by themselves even when empty. Have you ever struggled filling traditional garbage bags with the leaves you just raked up? Are you tired of having yard waste barrels taking up room somewhere? These bags are the answer to your problems.

When you’re ready to use them, the durable construction and built in supports allow the bags to stand up by themselves leaving you with two hands when filling them. Once you’re done filling them, the woven straps can be cinched together with a rope or carabineer (not included) making a trip to the compost pile or landfill a breeze. When the job’s all done, they fold flat once again. These reusable bags are made of a woven flexible polypropylene material and are 100% recyclable.

The rectangle shaped “Backyard Bag” is perfect for grass clippings, leaves, or small branches. The cylinder shaped “Garden Tote” is a handy size for garden work or dead heading flowers around the yard. But these bags can be used for so much more. Use them for recycling, laundry, firewood, toys, and more.

| | Dimensions | Weight Capacity | Volume Capacity | Total Cost with Tax |
|--------------|---------------------------|-----------------|-----------------|----------------------------|
| Backyard Bag | 20.5" w and l 36" tall | 500 lbs | 10 cu. Ft. | \$15.75 |
| Garden Tote | 22" diameter 22" tall | 500 lbs | 5 cu. Ft. | \$21.00 |
