

HF-27L

GEL STICKS FOR WATER, OIL, AND CONDENSATE REMOVAL FROM GAS WELLS

PRODUCT DESCRIPTION

Hydro Foam HF27L is a gel/paste-near liquid blend of surfactants and stabilizers. Available in extruded polymer tubes or dissolvable paper tubes.

PRODUCT BENEFITS

Surfactants are in a near liquid state. This allows for a quick foaming reaction. A near oil soluble surfactant allows for better foam activity when the fluid column is greater percentage oil than water. Polymer tubes allow for deeper penetration into the well fluid. The paper tube dissolves in just a few seconds allowing for a very quick response. This product has been fielded proven to be very effective in coal seam gas wells and low pressure shallow wells. Sticks made with paper tubes seem to perform the best in the above mentioned wells.

APPLICATION

Remove plastic bag, inject entire stick down the tubing. Experimentation may be necessary to determine usage.

SHIPPING AVAILABILITY

Stick sizes of 3/4" X 15" and 1 1/4" X 15" are available. Shipped in 50, 70, and 100 count cases. 55 gallon open top drum bulk shipments are also available. Other containers are optional.

TYPICAL PHYSICAL PROPERTIES

Odor.....Typical
Solubility.....Water soluble/Oil dispersible
Appearance.....Light
Shelf Life.....3 months, store in a cool dry area
