

Project Engineer - Land Development / Site Design

HFC is seeking a licensed professional engineer in the State of Iowa to work in our Land Development / Site Design division. The ideal candidate will possess, at minimum, a B.S. degree in Civil Engineering and five (5) or more years of experience with land development / site design related experience. The candidate must be proficient in AutoCAD Civil 3D; EaglePoint experience is a plus. A valid Iowa driver's license is required.

This position requires an individual who possesses strong communication skills (with co-workers, clients, contractors, reporting agencies, general public), who is highly self-motivated, detail-oriented, and organized, and works well in a team environment. This individual must demonstrate strong leadership skills, excel at multitasking and be able to meet deadlines.

This position will be responsible for all aspects of planning, cost estimating, design and plan preparation for residential, commercial and mixed-use development projects. This position will likely require the individual to research code issues and work with City, State, and County officials. Duties also include civil design for street, sewer, water and storm drain improvement plans, site grading, establishment of utilities and roadways requirements.
