

## DUTY TO WARN BEST PRACTICES

# Do you deliver to jurisdictional systems?

Companies with jurisdictional systems must meet specific requirements and are obligated to send additional safety information.

## Jurisdictional System Checklist

Are there 10 or more customers in the system?

Is any portion of the system in a public place and serves more than one customer?

Does the system serve a single customer, where a portion of the system is not on the customer's premises and a portion is in a public place?

If your system matches this criteria, you need a jurisdictional Duty to Warn to protect your customers, your employees, and your company.

*Color Code for Marking Underground Utility Lines			
	ELECTRIC		GAS, OIL, STEAM
	COMMUNICATIONS		POTABLE WATER
