

**ACCREDITATION
CANADA**

Qmentum International™ Accreditation for Emergency Medical Services (EMS) and Interfacility Transport

Whether you provide air or ground emergency medical services (EMS), interfacility transport, or emergency communication services, Accreditation Canada's evidenced-based Qmentum International™ program can help improve and maintain the quality, safety, and efficiency of your services.

The Qmentum International™ program offers:

- A step-by-step process to build and implement quality improvement plans and monitor outcomes
- Up-to-date and relevant standards of excellence
- A consultative, peer-review process using experienced EMS professionals that will engage staff and support change

Make an impact

- Identify opportunities to standardize care and improve efficiency
- Recognize areas of excellence
- Decrease the high cost of errors
- Prevent infection and reduce risk
- Provide safer and more effective care

Investing in quality creates value

- Show your commitment to quality and safety in a tangible way
- Establish partnerships and community awareness
- Motivate and empower staff
- Gain an advantage when bidding for new contracts or during contract renewal

Choose a program that fits your reality

Accreditation Canada accredits close to 800 EMS sites across Canada, including:

- Public and privately run facilities
- Single site organizations and larger, multi-site systems
- Rural, urban and remote locations
- Air and ground services
- Emergency services and interfacility transport

The EMS and Interfacility Transport standards include:

- Transport planning
- Vehicle safety (air and ground)
- Pre-hospital emergency health services
- Quality improvement
