

Metastatic Breast Cancer: Enhancing Treatment Tolerability, Adherence, and Patient-Centered Care - Sarah Donahue, MPH, NP, AOCNP®,

Learning objectives:

- Identify prognostic markers that impact treatment selection and treatment goals to individual patients with MBC
- Evaluate the efficacy and safety profiles of novel therapies for HER2-positive, HER2-negative, and triple-negative MBC
- Assess strategies to manage treatment-related adverse events, promote adherence to therapy, and ensure patient-centered MBC care
