

## 3400 Series IK PLASTI-SHIELD COLOR COATS

### Technical Information

**Archemya's 3400 Series Plasti-Shield Color Coats** is an advanced, solvent-based, VOC compliant color coat system designed to permanently recolor all the interior and exterior plastics. This product does not require any adhesion promoters and can provide excellent durability and appearance for faded plastic bumpers, claddings and trims. The **3400 Series** are very economical and are available in variety of automotive colors. This IK-formulation system is compatible with most urethane-base-clear topcoat systems and can be used on all textured plastics to improve the appearance of the substrate.

### Benefits:

- **Sticks to any Damaged and Discolored Plastic Bumpers, Claddings, and all TPOs.**
- **Works on flexible or Rigid Substrates**
- **Outstanding Flexibility**
- **Easy to Use and Cost Efficient IK Formula**
- **Available in Chevy Avalanche Light and Dark Gray, Ford Medium Titanium, Honda Black, and Minivan Dark Gray. Other Colors are Available upon Request.**
- **Comes in Quart, Gallon, and Aerosol**

### Properties:

**VOC Content:** 2.8 lb/gal
