

Animal Scent Newsletter

From the publisher's desk. My husband and I dropped by our town's animals shelter. Twenty two kittens were ill, exhibiting diarrhea and pus in their eyes. It was four hours before open house. Their chances of adoption looked hopeless. I took two unbleached coffee filters and on one poured 5 drops of Thieves Essential Oil and on the other 5 drops of Purification. I put 2 drops of Di-Gize in my palm and "dotted" the twenty two kittens with this on their bellies. One hour later all the kittens were fine! The open house was a huge success thanks to Gary Young and his incredible

devotion in bringing to us these gifts from Mother Earth. Many of us see our pets as family members. Too many other dear ones, particularly dogs and cats, have no homes. This newsletter was born to help both our own families and shelter animals. A portion from the sale of Animal Scent will go directly to purchasing Young Living Essential Oils for animal shelters.

Blind Dog's Pain Quickly Gone

Buddy, my blind Shih-Tzu, walked under my desk to sit at my feet. Suddenly he screamed, ran out of the room, and dropped to the floor in the hallway. He had poked his eye into a flash drive that was sticking out of my usb port. He was blinking his right eye and shaking in pain. The right side of his head was extremely sore and his eye was closed. At home I covered his head in Lavender and he rested. I diffused Idaho Balsam Fir, alternating Lavender and Helichrysum. I woke up during the night, alternating oils and diffusing Helichrysum. Buddy woke up the next morning with his eye wide open and in no apparent pain. I continued the oils and two days later he was back to normal. How wonderful to be able to help!

Dog's Digestive Issues Solved!

Rocco & Holly

Rocco, the newest member of our family started to get sick last Sunday. He threw up once on Sunday then started to mope around. When I noticed his stool was runny, I immediately rubbed 2 drops each of Peppermint oil & DiGize oil on his tummy to ease his discomfort. In about 15 minutes he resumed his playful high energy puppy antics with his sister, Holly! However, his stool contained what looked like little white polka dots. I wasn't sure what this was so I continued with the Peppermint & DiGize. After 5 days of semi-loose stool containing white mini polka dots, my friend Ellen Castell suggested we may want to add Thieves to the protocol. We started two nights ago with one vegan capsule containing two drops of Thieves oil. We mixed the vegan capsule into the brown rice & his organic dog food. We gave Rocco one capsule on Friday & Saturday night. This morning, his stool was back to normal! Rocco is feeling better than ever! We're so happy Rocco healed naturally! He's our newest addition to our Young Living family.

Love & hugs,

Christina Santiago, Rocco & Holly

Dog's Swollen Infected Paw Heals Easily

Bosco & Peggy DeArmond

Late one afternoon I discovered that my chocolate lab, Bosco had a badly infected back paw. His foot was swollen to twice its normal size and oozing lots of thick pus with a very foul odor. Upon closer inspection, I found that he had stepped on a very sharp wood chip that had gone through his foot and up through the top of his paw. I began soaking his foot in warm

and the wound quit oozing. Once this happened, I switched from Thieves to applying Melrose and Purification alternately for tissue regeneration as well as keeping the wound clean and free of bacteria, and the wound quickly closed up and is healing beautifully. I am so thankful for Young Living and for the knowledge and empowerment that enables us to take care of ourselves and our families, even in times of crisis!

Much love and light,

Peggy DeArmond & Bosco

water with epsom salts mixed with Thieves essential oil for 10 min 2-3 Xs a day. After soaking his paw each time, I irrigated the wound with a syringe, using alternately Thieves and Melrose. In addition to this, I gave him capsules of Inner Defense (containing Thieves, Oregano, Thyme and Citronella) alternating with capsules filled with Melissa (mixed with Hope). After his 1st capsule of the Melissa mixture, the foul odor completely disappeared. In addition to this, we noticed after a couple of days of receiving the capsules of Thieves and Melissa that his breath improved dramatically! After a couple of days of soaking his paw, the rest of the shard of wood came out

Horses' 3" Deep Gash Heals Beautifully!

Whisper

would shrivel up and cause her to be lame the rest of her life. My husband thought so too. Instead I got my essential oils and Animal Scent ointment out and went to work on her.

I cleaned and washed the wound out with Thieves Household Cleaner diluted in water and then I applied Thieves Essential Oil Blend around the outside to prevent infection. I dripped Melrose all over the wound and then Ortho Sport. I next covered it with Animal Scent ointment and wrapped it. I changed the dressing often and kept it firm but not too tight.

Photo #1 taken shortly after using the Essential Oils. You can see a lot of scar tissue that had filled in the cut. Again the neighbor said she will be lame because the scar

One morning when we went to check on the horses Whisper had part of her leg cut and bleeding with the tissue hanging down. Barb wire had cut a big strip on her hind leg down to the bone and tendon in a 3 inch gash. Our neighbor said we needed to put her down, she would never heal. She would not be able to grow the flesh back to cover the tendon and it

Photo#1

Photo#2

tissue will not let her be flexible. The scar tissue dissolved and now the hair is growing back and she never was lame. The oils and the formula I made for scar tissue did the job.

It took a good 2-3 months to get where we are now and in time the hair will all be back. See photo #2!

Scar-B-Gone: 10 Helichrysum, 6 Lavender, 8 Lemongrass, 4 Patchouly, 5 Myrrh mixed with 1 oz. V-6.

Overnight Improvement of Colic!

Trigger & Blaine Sanderson

We were moving our horses from their winter pasture to our new ranch. I noticed that one of our horses that we bought last fall wasn't acting right, but being busy in moving I forgot about him. The next day when we were watering the horses I noticed that Trigger was lying down. I watched him and he got up and later he laid down again. During that time of filling the water tanks he laid down 5 times. This is not normal for a horse to do. They will lie down but when they get up they

will not lie right back down again.

I knew Trigger probably had colic. When we were done Blaine and I caught him and we saw he really was looking sick. I listened to his stomach and there was barely any sound. This told us that he had colic. I gave him 20 drops Di-Gize inside the lip and 6 drops each of Peppermint and Di-Gize on the frog of the front feet. I gave him 6 drops of Di-Gize in a squirt of OrthoSport in the palm of my hand and I massaged from his flank down under his stomach to help relax the muscles.

In less than 3 minutes he had a

A 14-year old female Vizsla dog suddenly started to exhibit what closely resembled "sundowners" each evening. Two drops of Valor blend were applied to the 4 paws and both ears. 15 minutes later, one drop of Peace & Calming was applied to her front paws and she immediately began to relax. This has been repeated nightly, and there has been no more agitation at sundown.

A 4-month old Vizsla puppy had eaten pine

cones outdoors and was vomiting non-stop, to the point of getting dry heaves. A drop of Peace & Calming was applied to her front paws, and within minutes she had stopped wrenching and shivering, and was able to fall asleep.

I place 15 drops of Purification and 15 drops of Geranium and 8 ounces of distilled water into a spritzer and lightly mist all of my dogs before grouse hunting, and have not found a single tick on my dogs at the end of the day.

Michel Berner

Kennel Cough Gone In A Day

Gus and best friend Kiwi

We adopted a one pound Chihuahua, Gus, when he was 8 weeks old. He had severe kennel cough 24 hours a day and couldn't sleep. I applied peppermint to my hands and petted him from the neck down over the

course of two days. In 24 hours the cough was clearly sporadic rather than constant. By the second day it was completely gone and Gus was sleeping through the night!

Love & Light, Rebecca Preston, Parker, Cocoa, Kiwi & Gus

bowel movement and there was an increase of sounds in his stomach. After an hour of walking him around he seemed better. Before we left I gave him 40 drops of Di-Gize under his lip because the people we bought him from only de-wormed their horses once a year. So, we were concerned about the worms causing him to colic. I also noticed that he had a cough. We didn't have all our oils with us so the next day when we came down to water and check on the horses, I brought the rest of my oils to use. Trigger was better but still acted sick so we de-wormed him with 10 oz. of ParaFree. I also applied R. C.

and Melaleuca Ericifolia on his chest, Raven and Oregano on the frog of his front feet. I did the RainDrop Technique on his spine with Oregano and Thyme, plus he received Di-Gize again. The next day you wouldn't believe that he was the same horse! He had a sparkle in his eyes and his cough was gone. He came up to eat his grain and wouldn't let another horse take his grain. Days before he wouldn't eat and didn't care if they took his grain. The essential oils came to the rescue again in saving the life of this horse!

Arthritic Dog Has Spring In Her Step Now!

My 14 year old dog (shepherd / lab mix) was having a hard time walking down the stairs and just getting around. She was not as lively and even her bark was diminishing. She is arthritic in her hind legs but she is not on any medicine. I had a holistic vet give her acupuncture treatments as well as herbs and vitamins for dogs. It made a small difference but not enough to see her energetic spirit come back. I started to use the Young Living essential oils only and she now has a very strong " life force" and much more energy as well as no problem walking down the stairs! She is the spunky dog she always was and although she is 14 she is happy and has a spring to her step!! The oils I use on her are : PanAway, Spruce, Balsam Fir, Lavender, and Lemongrass. I apply them on her hind legs , upper back and the pads of her back feet. She loves them and looks forward to me applying them!!! Generally I apply them 2X a day .

Miraculous Recovery After Being Attacked

A neighbor's dog tore out of his yard and lunged into Chazworth, an Italian Greyhound/Terrier. The dog brutally attacked Chaz. It took over a minute for us to unlock this 70 lb dog's grasp on Chas, whose 16 lb body was whirling around like he was in a clothes dryer.

Back home, I applied Purification to the wound I could see. We rushed Chaz to the hospital. Surgery stitched his wounds in three places. There was no damage to any internal or external organs.

At 1:00 AM we were awakened to his moaning in pain. Dog bites are particularly difficult to heal because of the vast amount of tissue destruction. The Doctor could do nothing for his pain. It's a good month before the tissue would

regenerate and the skin would be normal. With a wet warm washcloth I applied Ortho Sport, Lavender, Helichrysum and peppermint to Chaz's tender wounds, the drainage tube and his stitches. The pup instantly stopped moaning, sighed and immediately went to sleep. I repeated this throughout the day and into the next day. A mixture of V-6 and Frankincense went on Chaz's paws to calm him down and provide a "systemic boost".

By Day 3 the swelling was gone and the skin was several shades lighter than before. I mixed Ortho Sport, Lavender, Rosewood, Myrrh, Frankincense, Roman Chamomile and Peppermint and applied this mixture to Chaz's wounds with the palm of my hands several times a

day. I applied LavaDerm Cooling Mist and applied this several times a day. LavaDerm was especially helpful in the middle of the night when Chas would wake up in discomfort. I could just roll over and spritz him and we could all return to sleep!

Chaz allowed me to apply the oils to all the niches of the wounds with my fingers.

Two weeks after the attack his stitches were removed. His abdominal area is completely back to its original color. Chaz is back to chasing squirrels with Bonny Jeane, squeaking his toys, eating enthusiastically, spirit and sense of humor intact, etc.

Sincerely, Randy Weiss

Dogs Allergies Improve

My dog is loving the Purification I use instead of the chemicals for preventing fleas and ticks. I also

started to put a few drops on a warm washcloth to wipe her down when she comes in from a long day outside. I

do this to clear all the pollen (that's allergy season for you) off her coat and to reactivate the oil she already

has on her coat. I have yet to hear Manuel [husband] sneeze when I do this!! Most importantly, Ninja loves it.

Araceli Rivas Maldonado

Goat's Aggression Solved

We have 3 pygmy goats, rooster, hen, 2 macaws & 2 dogs. The goats, Spanky, Babalou, & Lucy, were having problems. Spanky, the alpha has been getting too rough with the others. I saw Babalou on her back with her legs flaring, with Spanky playing rough. My husband ran out and turned her over. Fortunately she was okay.

Vic said why don't you use an essential oil on Spanky. We started using the blend Peace and Calming. Every night when they go to their house I apply a drop of Peace and Calming to the top of her head. In five minutes I could see a difference. Now she has a restful sleep at night, and is peaceful during the day.

Debra Mood-Wehnke

Fear Reduced With Household Cleaner

When a rescued dog entered my home, his new family said: "He's always jittery. He will bark and bark. He won't be quiet." My two cats, Sammy & Boodle just lay within a few feet watching Luke. Luke, on a leash was walked into my home office where he looked around, then lay down next to me. He stayed there for the half hour we were together. It was not my influence. It was the Thieves Household Cleaner and an all organic household that reduced the stress to his system.

Nancy O. Weber, RN

Asthma Problems Stopped

Last night, my dog, Sammy, had an asthma incident. He's will be 2 years old in March and is a Bichon Poodle. We adopted him from a shelter almost a year ago and he is "the love of our lives".

Of course, he sleeps in bed with us. Before retiring, he started "coughing". When he got into bed, I decided to put eucalyptus radiata on my chest and snuggled next to him. He "coughed" again. Then I put some lavender on my hands and cupped them in front of his nose. Within minutes, he was

Marlene & Sammy

fast asleep. The vet gave me asthma meds but I'd rather use the oils as a 1st course of action. *Blessings,*

Marlene Leitman

General Guideline on using Young Living Essential Oils*:

FOR SMALL ANIMALS: (cats and small dogs)
Apply 1-2 drops DILUTED with an
organic vegetable oil (80-90%) oil mixture per application.

FOR LARGE ANIMALS: (large dogs)
Apply 3-5 drops NEAT (not diluted) per application.

Dogs or cats, essential oils can be applied to tips of ears
when they have need of calming down.
Caution - NEVER put them inside of the ears or near
the eyes of animals or people. If you do get them in the eyes
quickly administer to the eye a vegetable oil. If in the ear,
try a cotton ball to soak up.

* From the *Essential Oil Desk Reference 4th Edition*

Use Special Caution With Cats

Consulting with a veterinarian is a good
policy before applying oils to cats for the first
time.

Cats metabolize things differently from dogs
and other animals. Cats generally have an
adverse reaction to citrus products. (From
the *Essential Oil Desk Reference 4th
Edition*)

New to Essential Oils?

Some of the products mentioned, like R. C.
are proprietary blends created by Young
Living, others like Animal Scent Ointment
are a compound of organic products
blended with essential oils, all are by Young
Living, the world's leader in essential oils.

"I find these Therapeutic Grade
Essential Oils to be the most effective,
safe and reliable anti-flea, tick and
mosquito products on the market."

Dr. Gerald M. Buchoff, DVM, Past
President of the American Holistic
Veterinary Medical Association

Tips for Pets & Their Pals

Dr. Herve Casabianca (Ph. D.) is associated with the **International Standards Organization (ISO)** in Geneva and the **Association Francaise de Normalization (AFNOR)** in France who set standards for essential oils. He has been quoted as saying, "there is only one company in North America who regularly sends samples to laboratories in France for testing to be measured against the international standards, and that is **Young Living, Inc.**" Dr. Casabianca, has also been quoted as saying, "Young Living oils are the only truly therapeutic grade oils of which I am aware, produced and/or marketed by an American company." (Certified Care Instructor Handbook, Care International, The Center for Aromatherapy.)

What most people recognize as aromatherapy according to Dr. Daniel Penoel in *Natural Home Health Care Using Essential Oils* is recreational fragancing. In the U.S. there are no standards for Essential Oils and most companies will not pay for the expensive testing to discover if they truly meet the strict standards of the French AFNOR testing lab or the ISO (International Standard Organization).

Do you know the "canary in the coal mine" scenario? Canaries would be sent in to coal mines, if they survived it would be considered safe for the miners! Our pets who live with us and our small children are the first to be effected by a toxic environment. Please consider using only organic products for your environment. It is best for all.

Thieves Oil Blend: This blend was created based on research about four thieves in France who protected themselves with cloves, rosemary, and other aromatics while robbing plague victims. This proprietary blend was tested at Weber State University, Ogden, UT, and found to have a 99.96% effective rate against airborne bacteria. Other uses for Thieves™ essential oil blend & personal care products:

- Toxic Mold
- MRSA
- Sinus Infections
- Periodontal Disease, and more.
- Young Living has a wonderful line of Thieves products, please contact the person whose name is on the bottom of this sheet.
