

# 10 TIPS FOR BETTER BUNTING

1. As pitcher goes into windup, the batter turns square so he is facing the pitcher.
2. Batter should be at the top of the batter's box (slightly in front of home plate) so bunted ball stays in fair territory.
3. Lower your backside like you are sitting in a chair.
4. Keep the elbows and arms bent for additional movement.
5. Your knees should control the bat. Lower the knees if you need to lower the bat.
6. Right hand must remain behind the bat to avoid injury.
7. Object of bunting is to get the ball down either the first or third base line.
8. Direct the ball with the bat to angle the ball down the baselines.
9. Keep the bat level with the eyes to avoid bunting balls out of the strike zone.
10. Simply focus on making contact with the ball.
