Towns County Erosion Control and Compliance Procedures and Questions

The National Pollutant Discharge Elimination System- Stormwater Discharges Associated with Construction Activity (Permit) requires that a Notice of Intent and Erosion and Sedimentation Control Plan (Plan) be submitted to this office fourteen days prior to the initiation of land disturbance for projects with disturbance greater than/equal to one (1) acre. The Permit requires that the Plan, copies of NOI, and fee payment return receipt be onsite at all times. The Erosion and Sedimentation Act requires that all land disturbance projects within two hundred feet of state waters have an erosion and sedimentation plan regardless of size. Upon inspections, the GA EPD requires that Best Management Practices be followed at all construction projects.

Please note that under O.C.G.A. 12-7-6 (b)(15) and Section IV of the General National Pollutant Discharge Elimination System (NPDES) Permit for Storm Water discharges, it is unlawful to conduct land disturbing activities within 25 feet of the banks of State Waters deemed non-cold waters by Georgia Department of Natural Resources Rules for Water Quality Control 391-3-6-.03 (body of Lake Chatuge equal to and below the normal full pool elevation) without a variance from the Director of Georgia's Environmental Protection Division.

O.C.G.A. 12-7-6 (b)(16) and Section IV of the Permit makes it unlawful to conduct land disturbing activities within 50 feet of the banks of State Waters deemed cold water streams by Georgia Department of Natural Resources Rules for Water Quality Control 391-3-6-.03 (all streams, creeks, rivers, etc. in Towns County) without a variance from the Director of Georgia's Environmental Protection Division.

I encourage anyone with questions regarding the identification of state waters to contact me at 770-387-4900. I am also available to answer any questions regarding erosion and sedimentation control issues in Towns County.

TOWNS COUNTY
CULVERT INSTALLATION
APPLICATION, SITE REVIEW, AND PERMIT

This application is being made by _____ for permission to install a driveway culvert at the property listed below. This property adjoins a county-owned or county-maintained road.

Property location: _____

Residential Sub-division Lot # _____ Tract _____ County owned or maintained road is paved? Yes No
Applicant is: Owner Contractor Phone #s _____

The following requirements must be met:

1. A Driveway permit may be obtained at no charge from the Commissioner's office to be approved by the Road Department before any culvert installation begins.
2. A dig permit must be obtained from the Utility Protection Center at (800) 282-7411 before any culvert installation begins. Call a minimum of 3 days before work begins. (all underground utilities will be located at NO CHARGE i.e. electric, phone, sewer, water, gas and television cable)
3. This application must be pre-approved by the Georgia Department of Transportation yes no
4. Adequate Sight Distance Each Direction: yes no
5. The culvert must be metal, a minimum of 15" in diameter by 30' in length*. The culvert must be located in line with the existing ditch: however culverts must be a minimum of 4 feet from the driving surface of the county road. If upon inspection, the County determines that these minimum dimensions are not suitable the following are required: *(a variance may be granted by the road dept. according to the terrain and construction of the road)
_____ Diameter _____ length _____ distance from driving surface
6. Each construction access entrance must be graded and covered with gravel for a minimum of 50' from the county road. The gravel must be in place before the drive can be used to access the property and before culvert or building construction begins.
7. The driveway must be constructed so that no water, silt, or debris is carried onto road. This requires that the driveway be sloped away from the county road for a minimum of four (4) feet measured from the intersection of the county road and the driveway (see attached diagram).
8. During construction, the existing ditch line must be maintained as to not interfere with normal water flow.
9. The location of the proposed culvert must be marked so that the county road department can perform a pertinent site inspection.
10. Any required paving must be permitted and inspected by the Towns County Road Department and completed within twelve (12) months.

Additional comments and criteria:

I hereby certify that I will comply with all requirements for installation of this culvert.

Applicant's Signature: _____
Date: _____

PERMIT

Proposed culvert installation has been reviewed and approved by Towns County Road Dept.

Signature: _____ Road Dept. Superintendent Permit Date: _____

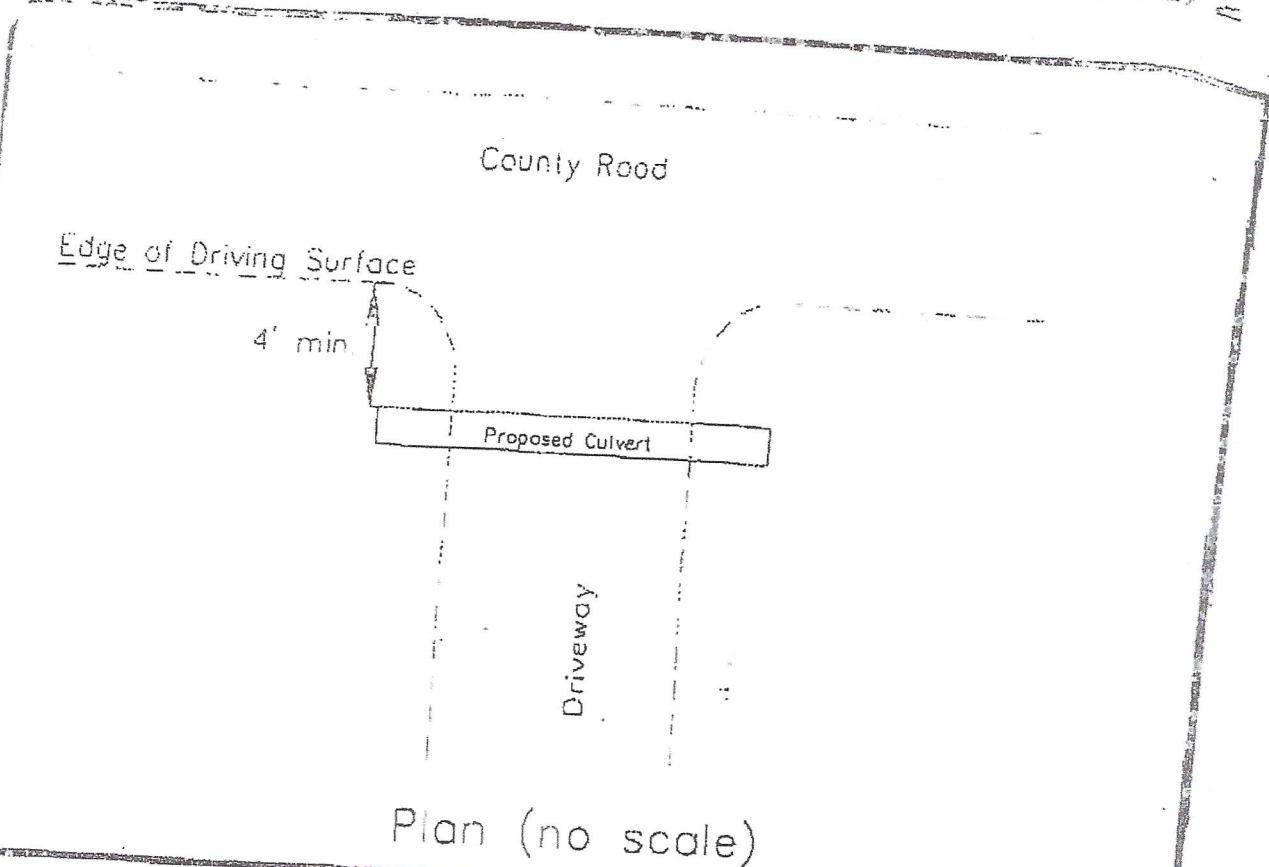

This permit is issued subject to Applicant complying with all listed conditions. The Road Department must be contacted at 706 896-2276 after culvert installation is completed to schedule an inspection.
