### At-Home Color Maintenance

Your Custom Blonde Toner Kit was designed to maintain your beautiful blonde tone between appointments.

Blonde Tones range in color from Creamy Beige to Pearlescent to Icy Silver Blonde.

Problems with tone fading between appointments can be from: consistent sweating from activity, washing 3 times or more per week, activities in the sun, saunas, swimming, and constant mechanical heat styling to name a few.

Well-water and certain styling products with high pigment will also alter tone.

Your Custom Blonde Toner Kit delivers longer lasting tone than colored shampoos because it is a demi-permanent high shine color gloss.

Your Custom Blonde Toner Kit is custom blended specifically for you, so there's no hyper pigmentation, or under pigmentation like colored shampoos.

Your Custom Blended Blonde Toner formula is kept on file for reliability.

Once you've purchased your Blonde Toner Kit, you can purchase your custom refills from your stylist. Your refill will consist of your custom blonde formula and matching developer. You can also refill your gloves and cap with your stylist for your convenience.

- 6) A Blending Color Comb
- 7) A Single Sheet Of Blonde Toner Kit Instructions With Your Stylist's Notes For You Should You Need Any

Your Blonde Toner Kit Comes in a convenient premium tote that you can store under the sink in your bathroom.

## How To Use

- 1)** Processing Time will greatly vary on wet hair vs. dry hair. Color Processing is best on freshly washed and towel-dried hair. Color Processing times on towel-dried hair range from 5-8 minutes, so watch closely in the mirror. Dry hair can process as fast as 3 minutes.
- 2)** It is best to apply your toner fresh out of the shower while wearing a towel or button-down shirt, this will be easier to get back in the shower for washing out the color or washing out the color in the kitchen sink.
- 3)** Be sure you have your gloves on to protect your hands during the toning process!
- 4)** Mix your toner and developer in your applicator bottle per your stylist's instructions. Shake it up to mix thoroughly while placing your finger over the nozzle. Always color hair in the bathroom and watch for any drops on the floor or counter during the application process. If you feel more comfortable, you can apply your toner in the shower.
- 5)** Apply your color over smoothed combed out hair, in quick even strokes, from your hairline down to the nape of your neck. Use a consistent and even pressure to squeeze your toner out quickly.
- 6)** Massage the color quickly for blending and quickly apply the rest of the product to your ends.
- 7)** Massage it through and use your color comb for even saturation.
- 8)** Watch closely for up to 8 minutes. Once it is processed, rinse very quickly and thoroughly, wash with shampoo, and apply your conditioner.
- 9)** If you get a drop of toner in your eye, flush thoroughly with water.
- 10)** It is advisable to use your Blonde Toner Kit at the halfway mark between scheduled appointments.
