

Samish Work Week

April 29-May 4

Calling for Volunteers!

Come for a day or two of volunteer work—or stay for the whole week—to help get our campground ready for the coming season. Accommodations and meals provided!

All Skills are Needed

There's something for everyone, including a great week of fellowship! We are taking on an ambitious set of projects: upgrade three rustic cabins; finish the interior ceiling of the gazebo; paint two colors of the rustic cabins; repair/replace cabin porches; chip brush for mulch and carbon source for composting; perform general yard work, cleaning, sewing (bring sewing machine), and bicycle repair (bring tools).

Those wishing to participate in construction should bring tools with which you are comfortable working. Tools should be clearly marked by their owners. The campground has tools for those who do not have them. For working on the rustic cabins, there will be a need for reciprocating saws and miter saws.

Please RSVP

Contact John VanDerWalker
