

AlkaViva Athena Combo - BioStone Plus & Fluoride Shield

SKU: COMBO_ATHFLR_BIOPLUS

\$169.90

Alkaviva Athena (JS205) Combo Pack

City Water Special - Remove Chlorine and Fluoride

Also Known as Jupiter Athena

Combo Pack Includes

- 1 ea Alkaviva UltraWater Fluoride Shield and
- 1 ea .BioStone Plus Filter (Good for Chlorine

BioStone Plus Filter

The new Biostone Plus Filter specifically targets the removal of chlorine and chloramines as well and is ideally suited for municipal waters that are treated with these chemicals.

The Biostone Plus fits the same Ionizers as the standard Biostone filters. The Biostone Plus is a 9 stage filter that includes calcium with magnesium, tourmaline, and intermittent layers that target chloramines and chlorine and some heavy metals. The calcium content is premium grade, certified by the Japanese Government, and helps re-mineralize the water .It also changes some fluoride molecules to a benign compound of calcium fluoride. Tourmaline improves waters ability to carry an ionized charge naturally decreasing the ORP. New Biostone Plus also includes vortex technology for improved performance.

The Biostone Plus is manufactured in the USA with NSF certified components. This filters life expectancy is approximately 1000 gallons based on relatively clean source water. The filter is biodegradable and should be changed annually if you haven't used 1000 gallons.

NSF Certification is valid in all states, including California, where the certification originated.

Sediment Filter

f you're concerned about Fluoride in their drinking water, the UltraWater Fluoride Shield offers protection. The Fluoride Shield was designed for use in the AlkaViva Athena Dual

Filter water ionizer to remove Fluoride and Arsenic. It can also be used in many other AlkaViva machines. This filter, the result of two years research and development, contains an advanced all natural, chemical free media. Fluoride Shield is part of the new technology UltraWater Filter, patent-pending, product set designed reduce virtually all contaminants in tap water to non-detectable levels.

The UltraWater Fluoride Shield Filter is generally effective in processing up to 500 gallons of water. The capacity will vary depending on the amount of Fluoride in your water. A general estimate for a 1 to 2 person household is that the filter should be changed every 6 months. When installing in your AlkaViva Athena it should go in Postion #1.

Specifications –

- Fluoride and Arsenic Removal to non-detectable level
- Filter Media – All Natural Proprietary Material, AlkaViva Patent Pending
- Capacity – Up to 500 Gallons depending on Fluoride ppm
- NSF Certified
- MADE in USA

While this Filter was designed for the AlkaViva Athena dual filter system, it will also fit the following machines

The UltraWater Fluoride Shield is manufactured in the USA with NSF certified components. This filters life expectancy is approximately 500 gallons based on average Fluoride ppg in water. The filter is biodegradable and should be changed annually if you haven't used 500 gallons.
