## Three Cyber Security Experts Form New Partnership

*Wilmington, NC, March 16, 2017* — Three cyber security experts have formed a new partnership. Based in Wilmington, **Cyber Security Integration (CSI)** brings together three seasoned professionals with expertise in risk management, security (cyber and physical), legal and regulatory compliance, and technology. The CSI consulting team consists of **Larry Blumenfeld**, BS Criminology, former system integrator and founder of Access Control Consultants; **David Willson**, risk management and cyber security attorney with Titan Info Security Group, LLC and **Charles Tendell**, cyber security expert and ethical hacker with Azorian Cyber Security.

Cyber security refers to preventative methods used to protect information from being stolen, compromised or attacked. “CSI takes a proactive and adversarial approach to protecting computer systems, networks and individuals from attacks,” explains CSI white hat hacker, **Charles Tendell**. “Preparation is the key to lowering the risk of a cyber attack,” continues **David Willson**, legal-cyber expert at CSI, “and then reacting quickly when a breach or incident is discovered.”

CSI’s unique focus is to help companies understand how cyber security relates to and can devastatingly impact their business, and to provide solutions, education, resources and rationale towards improved cyber security processes. “Our goal,” states CSI President, **Larry Blumenfeld**, “is to assist companies in reaching levels of reasonable security mandated by state, federal and international laws, which require businesses to protect the personally identifiable information (PII) of employees, vendors and customers, as well as the data most important to the business.”
