

Summer Village of Yellowstone

Policy #4-2015 – Windrow Removal Policy

Policy Statement

The Summer Village of Yellowstone provides snow removal services on all roads in the Summer Village. The Summer Village deems it appropriate to deal with the removal of **ONE** windrow from the driveway of each residential improved lot to allow for ease of access year-round. Snow removal driveway width not to exceed 20 feet. In the event of an extreme snowfall, windrow removal will not be considered a priority.

Reason for Policy

The Summer Village has many seasonal residents who still utilize their properties periodically during the winter months. The windrow build-up over many snow removal periods makes it difficult for many residents to remove the driveway windrow.

Related Information

Council will budget annually for the costs of the snow removal contractor to remove **ONE** driveway windrow from each residential improved lot.

Responsibilities

- It will be the responsibility of the Summer Village of Yellowstone to contract annually to a snow removal contractor and to include the removal of **ONE** driveway windrow from each residential improved lot during periods of snow removal.
- Council will not budget for the removal of the windrow from any vacant lots.
- Snow removal driveway width not to exceed 20 feet.

Date Approved: November 20, 2015
