

Well-Being Policy
Blackwell Primary School

Last Updated Month/Year: September 2018

Mental health is a state of well-being in which every individual realises his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community. (World Health Organization)

At Blackwell Primary School, we aim to promote positive mental health for our pupils and staff. This document describes the school's approach to promoting positive mental health and wellbeing. This policy is intended as guidance for all staff including non-teaching staff and governors.

The Policy aims to:

- Promote positive mental health in all staff and students
- Increase understanding and awareness of common mental health issues
- Alert staff to early warning signs of mental ill health
- Provide support to staff working with young people with mental health issues
- Provide support to students suffering mental ill health and their peers and parents/carers

Whilst all staff have a responsibility to promote the mental health of students. Staff with a specific, relevant remit include:

- Mrs R Boswell- mental health lead/designated safeguarding officer
- Mrs G Gardner- deputy designated safeguarding officer
- Miss J Hatter - PSHE leader

Any member of staff who is concerned about the mental health or wellbeing of a student should speak to the mental health lead in the first instance. If there is a fear that the student is in danger of immediate harm then the normal child

protection procedures should be followed with an immediate referral to the designated child protection office of staff or the head teacher. If the student presents a medical emergency then the normal procedures for medical emergencies should be followed, including alerting the first aid staff and contacting the emergency services if necessary.

Individual Care Plans

An individual care plan or school passport for pupils causing concern or who receive a diagnosis pertaining to their well-being. This should be drawn up involving the pupil, the parents and relevant health professionals. This can include:

- Details of a pupil's condition
- Special requirements and precautions
- Medication and any side effects
- What to do, and who to contact in an emergency
- The role the school can play

Teaching about Mental Health

The skills, knowledge and understanding needed by our students to keep themselves and others physically and mentally healthy and safe are included as part of our developmental PSHE curriculum and ongoing assemblies.

The specific content of lessons will be determined by the specific needs of the cohort we're teaching but there will always be an emphasis on enabling students to develop the skills, knowledge, understanding, language and confidence to seek help, as needed, for themselves or others.

Signposting

We will ensure that staff, students and parents are aware of sources of support within school and in the local community. What support is available within our school and local community, who it is aimed at and how to access it is on our school website.

We will display relevant sources of support in communal areas to increase the chance of student help-seeking by ensuring pupils understand:

- What help is available
- Who it is aimed at
- How to access it
- Why to access it

Warning Signs

School staff may become aware of warning signs which indicate a student is experiencing mental health or emotional wellbeing issues. These warning signs should always be taken seriously and staff observing any of these warning signs should communicate their concerns with Mrs R Boswell or Mrs G Gardner.

Possible warning signs include:

- Physical signs of harm that are repeated or appear non-accidental
- Changes in eating / sleeping habits
- Increased isolation from friends or family, becoming socially withdrawn
- Changes in activity and mood
- Lowering of academic achievement
- Talking or joking about self-harm or suicide
- Expressing feelings of failure, uselessness or loss of hope
- Changes in clothing - e.g. long sleeves in warm weather
- Secretive behaviour
- Skipping PE or getting changed secretly
- Lateness to or absence from school
- Repeated physical pain or nausea with no evident cause
- An increase in lateness or absenteeism

Managing disclosures

A pupil may choose to disclose concerns about themselves or a friend to any member of staff so all staff need to know how to respond appropriately to a disclosure. If a pupil chooses to disclose concerns about their own well-being or that of a friend to a member of staff, the member of staff's response should always be calm, supportive and non-judgemental. Staff should listen, rather than advise and our first thoughts should be of the student's emotional and physical safety rather than of exploring 'Why?'

All disclosures should be recorded in writing using the school welfare concern sheet and held on the pupil's confidential file.

This information should be shared with the mental health lead, Mrs R Boswell who will provide store the record appropriately and offer support and advice about next steps. Information must always be shared with another member of staff and / or a parent due to the age of the children that we teach

Working with Parents

Where it is deemed appropriate to inform parents, we need to be sensitive in our approach. Before disclosing to parents we should consider the following questions (on a case by case basis):

- Can the meeting happen face to face? This is preferable.
- Where should the meeting happen? At school, at their home or somewhere neutral?
- Who should be present? Consider parents, the pupil, other members of staff.
- What are the aims of the meeting?

It can be shocking and upsetting for parents to learn of their child's issues and many may respond with anger, fear or upset during the first conversation. We should be accepting of this (within reason) and give the parent time to reflect.

We should always highlight further sources of information and give them leaflets to take away where possible as they will often find it hard to take much in whilst coming to terms with the news that you're sharing. Sharing sources of further support aimed specifically at parents can also be helpful too e.g. parent helplines and forums.

We should always provide clear means of contacting us with further questions and consider booking in a follow up meeting or phone call right away as parents often have many questions as they process the information. Finish each meeting with agreed next step and always keep a brief record of the meeting on the child's confidential record.

Working with All Parents

Parents are often very welcoming of support and information from the school about supporting their children's emotional and mental health. In order to support parents we will:

- Highlight sources of information and support about common well-being issues on our school website

- Ensure that all parents are aware of who to talk to, and how to get about this, if they have concerns about their own child or a friend of their child
- Make our mental health policy easily accessible to parents
- Share ideas about how parents can support positive mental health in their children through our regular information evenings
- Keep parents informed about the mental health topics their children are learning about in PSHE and share ideas for extending and exploring this learning at home

Supporting Peers

When a student is suffering from well-being issues, it can be a difficult time for their friends. Friends often want to support but do not know how. In the case of self-harm or eating disorders, it is possible that friends may learn unhealthy coping mechanisms from each other. In order to keep peers safe, we will consider on a case by case basis which friends may need additional support.

Additionally, we will want to highlight with peers: □ Where and how to access support for themselves □ Safe sources of further information about their friend's condition □ Healthy ways of coping with the difficult emotions they may be feeling

Training

As a minimum, all staff will receive regular training about recognising and responding to mental health issues as part of their regular child protection training in order to enable them to keep students safe.

Training opportunities for staff who require more in depth knowledge will be considered as part of our performance management process and additional CPD will be supported throughout the year where it becomes appropriate due developing situations with one or more pupils.
